Description:

- Example Description
PIN PTB8 - toggled using Siul2_Dio_Ip driver
 - 1.1 The application software functionality
PIN control with write channel
- Installation steps
 - 2.1 Hardware installation
 - 2.1.1 Supported boards
- S32G-VNP-RDB2 RevC
 - 2.1.2 Connections
PTD5 is controlling the LED - when low level is turn on the LED when high level is turn off the LED.
 - 2.1.3 Debugger
The debugger must be connected to J48 20-pin JTAG Cortex Debug connector.
 - 2.2 Software installation
 - 2.2.1 Importing the S32 Design Studio project
After opening S32 Design Studio, go to "File -> New -> S32DS Project From Example" and select this example. Then click on "Finish".
The project should now be copied into you current workspace.
