

THE LEADER IN RESINOUS FLOORING®

TECHNIQUEX®
LLC

EPOXY/URETHANE FLOORING | URETHANE CEMENT FLOORING | TRAFFIC COATINGS

TECHNIQUEx® VISION

Powered by innovation, we contribute to the world-class image of our clients by delivering floors with unsurpassed performance.

OUR MISSION

It is Techniquex's mission to build upon our reputation as the nation's leading resinous flooring contractor.

We will accomplish this through an unwavering focus on:

FRESH TECHNOLOGY

We invest in equipment, processes and materials that yield the highest quality floors while providing the best value to our customers.

EMPLOYEE EXCELLENCE

We hire only the best employees the industry has to offer, treat them with fairness and respect, and provide the training and opportunities needed to help them achieve their career goals.

CUSTOMER SATISFACTION

We make our customers the company's highest priority by providing creative and effective solutions to their flooring challenges, ensuring 100% satisfaction upon project completion, and treating them with respect and integrity.

CONTINUOUS IMPROVEMENT

We focus on continuous improvement in all areas of the company, which provides our customers with the best value in resinous flooring.

In the end, it is Techniquex's goal to make every potential customer a customer for life!

Leading the Way in Resinous Flooring

GREETINGS FROM TECHNIQUEx®

We are the Industry Leader in Resinous Flooring...

Since our inception in 1984, we've earned a reputation for delivering superior craftsmanship and overall value by operating a professional and dependable company. We built this reputation through our dedication to total customer satisfaction.

We procure the highest quality materials and employ only the finest flooring technicians in the industry. Our delivery on this commitment has brought us recognition as the leader in resinous flooring, and we continue to add to that reputation each and every day.

Through the teamwork of our tenured flooring design specialists, diligent project managers, expertly trained flooring technicians and knowledgeable customer support staff, we have successfully installed over 100 million square feet of resinous flooring. Each of our customer engagements, our people, our approach and our premium products combine to deliver outstanding results within budget and on time. In fact, we have never faced liquidated damages on any project— Ever!

At Techniquex, we have the resources to complete any feasible fast-track installation. Additionally, our strong training program has earned us an impeccable safety record.

We are proud of our dedication to Green. We take our role as a concerned corporate citizen very seriously. Every product we offer our customers is environmentally friendly

while meeting or exceeding the performance standards of traditional Non-Green materials still widely used in the industry.

When it's time for your next resinous flooring project, please contact Techniquex. I can assure you we will deliver the highest-quality resinous flooring while offering the best value.

Sincerely,

BARON ADELMANN
President
Techniquex

The Best Flooring Products and Installation

As the leader in resinous flooring, Techniquex® is proud to employ multi-talented, well trained, professional project managers and the finest flooring technicians in the industry. We install the following resinous flooring systems:

Epoxy/Urethane Flooring
Urethane Cement Flooring
Traffic Coatings

You can learn more about our approach to these disciplines by visiting our Contractor website at: www.Techniquex.com or our Manufacturer's website: www.DiamondStoneProducts.com.

Otherwise, feel free to contact us at 1-877-376-9935 and talk with a Flooring Design specialist.

TECHNIQUEX INSTALLS 100% GREEN PRODUCTS!

In light of our nation's ongoing concerns regarding corporate footprints, global warming and environmentally harmful products, we have worked hard to ensure that all the products we offer are friendly to our environment. Throughout our transformation to a Green company, we have made certain that every product we install meets or exceeds the performance characteristics of traditional Non-Green products.

All flooring systems installed are eligible for LEED™ points. Talk to your flooring design specialist about LEED accreditation for your project.

At Techniquex, we take our role as a concerned corporate citizen quite seriously and we are proud to point to our Green accomplishments as another example of how we are leading the way in resinous flooring.

Diamond-Rock®

Poured Epoxy Flooring

Our team of highly skilled flooring technicians have unmatched experience and a sterling performance history installing epoxy flooring products, assuring expert installation of your project.

By offering installation of varying types of epoxy/urethane products, we can deliver an epoxy/urethane flooring system tailored to your specific environment, even under the toughest environmental conditions and scheduling constraints.

Techniquex® is proud to be the preferred installer of DiamondStone® products. DiamondStone epoxy/urethane products are considered the highest-grade resinous flooring materials in the industry.

We offer installation of 4 Standard Formulations of epoxy flooring:

20-MIL SYSTEM

This system is designed for use as a re-coat to an existing sound and well-bonded epoxy system.

SLURRYSTONE® SYSTEM

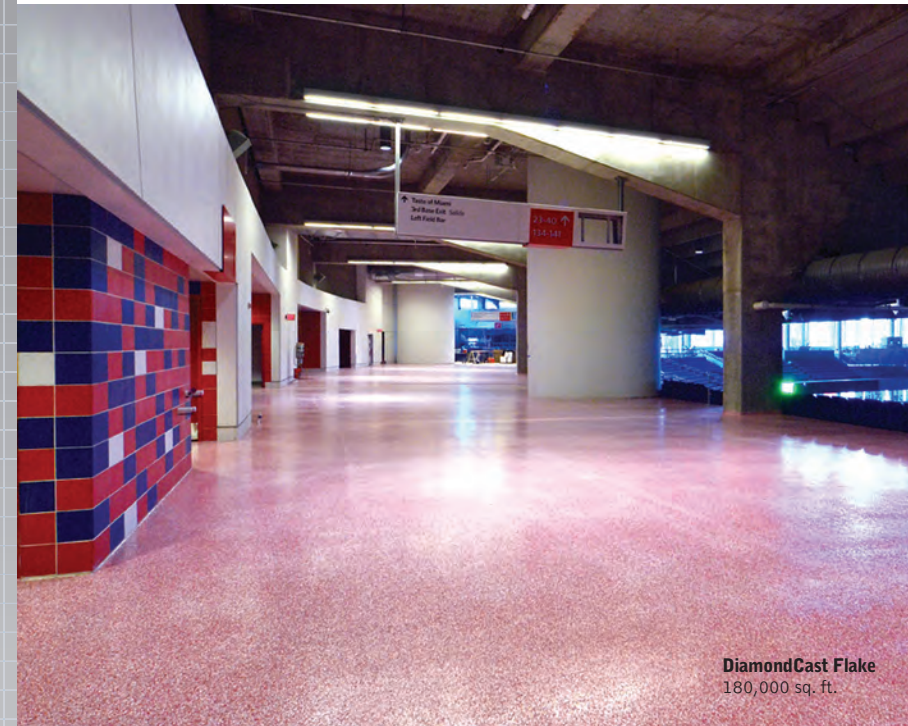

This system is designed for light-to-medium traffic, and where light-to-medium impact exists and a high-gloss, smooth surface is desired.

DIAMONDCAST® SYSTEM

This system is designed for medium traffic, and where medium impact exists and a decorative system is desired.

DIAMOND-HD® SYSTEM

This system is designed for medium-to-heavy traffic, and where medium-to-heavy impact exists and a decorative system is desired.

DiamondCast Flake
180,000 sq. ft.

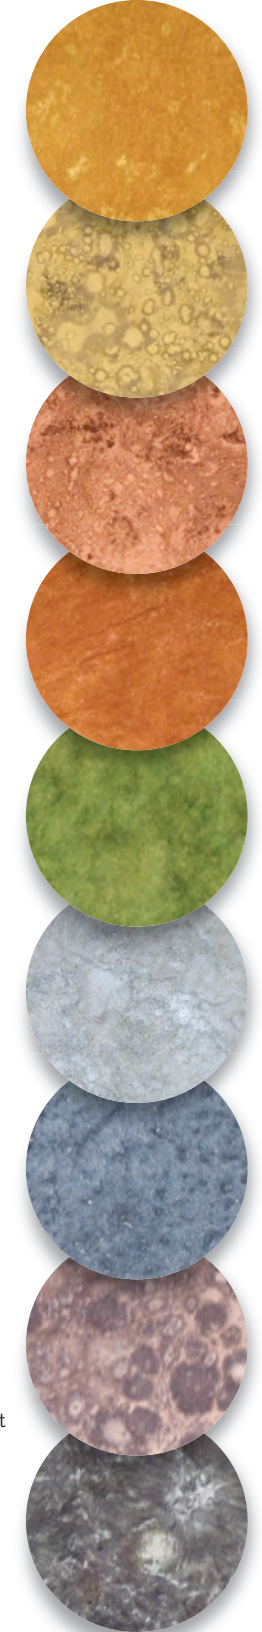

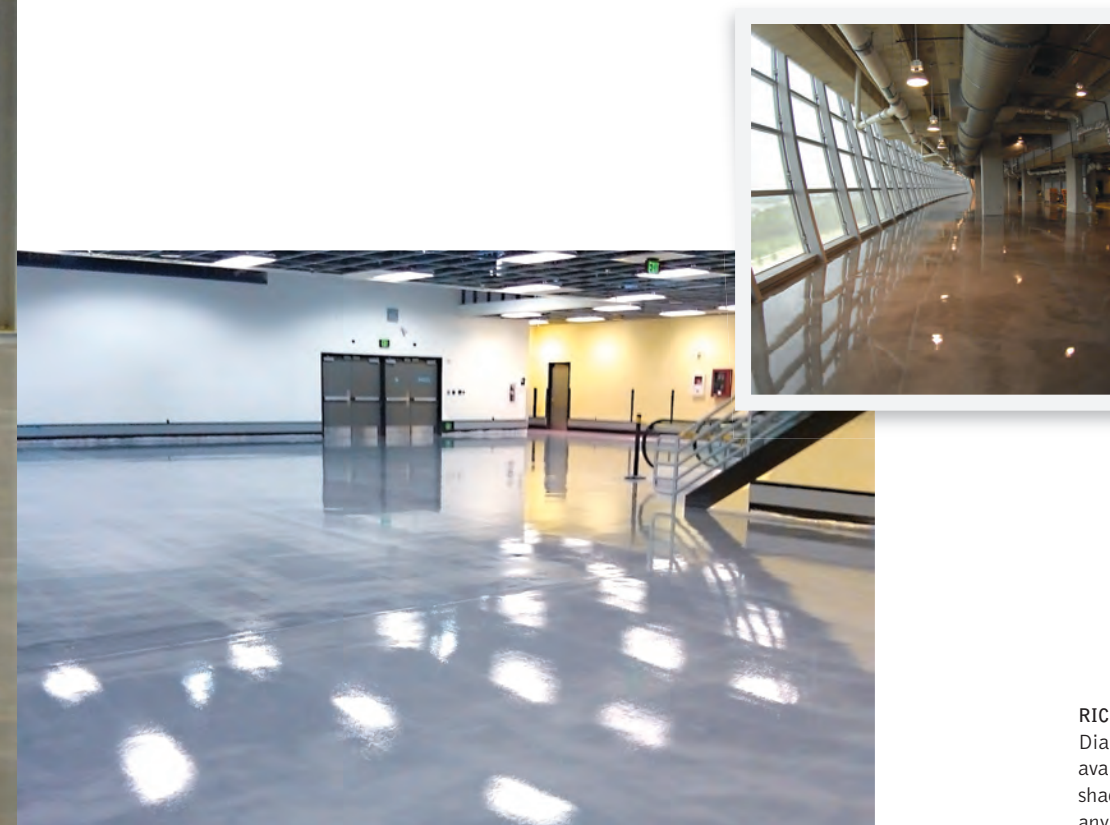

Cowboys Stadium
Arlington, Texas

Diamond-Metallic®

Diamond-Metallic is a 100%-solids decorative topping designed for both durability and beauty.

Diamond-Metallic uses metallic particles blended into the polymer resin. A liquid dispersing agent can be spray-applied to the wet flooring to distress the metallic particles, producing a decorative and variegated finish. Diamond-Metallic can be topcoated with a wide variety of DiamondStone® urethane topcoats, depending upon the desired texture and finish.

RICH COLORS
Diamond-Metallic is available in 9 different shades to compliment any color palette

Urethane Cement Flooring

Installing urethane cement flooring is a fairly common practice; however, making it look great is an art form. At Techniquex we're experts in fast-track installation of DiamondStone® Diamond-Crete® flooring, a product that inhibits the growth of bacteria, delivers a great appearance, has unsurpassed durability and is backed by the longest warranty in the industry.

Diamond-Crete flooring was once offered exclusively for the food and beverage processing industries. This innovative brand provides unlimited moisture tolerance, excellent thermal-shock and thermal-cycling resistance and integrated Non-Sacrificial Anti-Microbial additive. Furthermore, its crisp appearance and outstanding durability are why the Diamond-Crete product line has gained popularity in a host of other environments such as manufacturing, automotive service facilities and commercial kitchens, to name a few.

Diamond-Crete is available in 3 Standard Formulations:

DIAMOND-CRETE TG®

Designed for use on heavily degraded surfaces where high traffic exists

DIAMOND-CRETE RT®

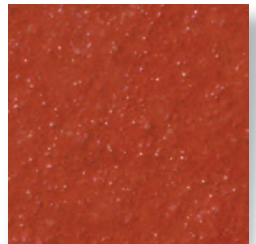

Designed for medium-to-light degraded surfaces where high traffic exists

DIAMOND-CRETE BG®

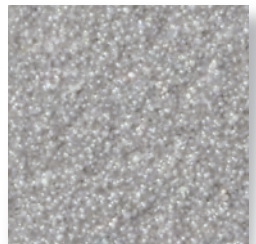

Designed for light-to-non-degraded surfaces where low-to-medium traffic exists

Traffic Coatings

Making your vehicular or pedestrian traffic deck watertight is one thing... making it water-tight and aesthetically pleasing is our specialty.

All of the deck options Techniquex® installs offer excellent durability, UV resistance and chemical resistance. The most popular deck by far is the Green-Deck® system from DiamondStone®. Like all of the products we offer today, Green-Deck is an environmentally friendly, completely Green decking system that has performance properties exceeding those of Non-Green products still widely used in the industry. Moreover, our extensive background in epoxy/urethane flooring helps us deliver a level of quality that exceeds the strictest industry aesthetic standards. We bring this installation quality, along with the functionality of a waterproof membrane, to all of our traffic coating installations.

Additional Green-Deck colors are available by request

10 Resinous Flooring Questions:

- 1. What do I want from a resinous floor?** Texture, longevity, chemical resistance, moisture control, and aesthetics are all important in the decision-making process and need to be considered at the onset of the project in order to design a flooring system tailored to your environment and desired finish. At Techniquex,[®] we have flooring design specialists who are experts in the engineering and designing of flooring systems to specifically address the unique needs of your environment.
- 2. What is my true amortized annual cost of the flooring system I am considering?** Installing the right floor leads to the longest life cycle, and therefore provides the lowest year-over-year cost. Purchasing resinous flooring can be very confusing. Typically, pricing and recommendations are all over the map. The lowest up-front price is typically not the lowest cost.
- 3. Who is actually going to install my floor?** We understand that quality of the installation is the most significant variable in the resinous flooring business. It is commonplace in the industry for large epoxy manufacturers to pose as contractors. They rely on subcontractors over whom they have little control to get the job done and deliver what was promised. At Techniquex, we do not use "company crews," "installation teams," "partners" or "affiliates" to install your floor. We use dedicated Techniquex employees who are certified experts in the installation of resinous flooring. This business model allows us to guarantee quality and consistency for each and every project by maintaining complete control of the installation, from specification to completion.
- 4. Do the companies I am evaluating really have what it takes?** At Techniquex, we offer expert installation of the freshest technology available. Techniquex can engineer a flooring package that meets your budget, while delivering a long-lasting, world-class image. We have the equipment, manpower and skill to complete projects under the tightest of schedules without compromising quality.
- 5. Does choosing Green products mean I have to sacrifice quality or performance?** Absolutely not. Techniquex is the preferred installer of DiamondStone[®] which is a product line dedicated to environmentally friendly products as defined by the United States Green Building Council. Toxic and combustible chemicals won't be a concern, as Techniquex carefully selects products that exhibit exceptional performance while being gentle on the environment. Most of our products can be installed while your facility is in full operation.
- 6. How does concrete moisture affect my floor?** All concrete has moisture in it. Some concrete's moisture levels are higher than allowable by floor goods manufacturers' standards. Higher than normal vapor emissions from concrete can be detrimental to most floor goods, causing floor failures, mold, bacteria, and even sick building syndrome. Techniquex recommends and installs products with either unlimited moisture tolerance or a high threshold for concrete moisture.
- 7. Should I be more concerned with the quality of the product or the contractor?** It is very important to get the right product type. Poor recommendations can cause a flooring failure. Certain products within a product category will perform better than others. However, the greatest difference in resinous flooring is the contractor. There are many companies claiming to be a contracting firm, only to turn around and subcontract your project to the lowest bidder. This leads to inconsistency, as the company loses control of the project. Resinous flooring is not a cookie-cutter business. Each job is unique and requires an exceptionally high level of detail. It is imperative to the success of the floor that you hire a quality-minded contractor with its own employees and a long track record of experience.
- 8. How will I know that the floor I specify will be the floor that's installed?** This is a very common problem. A coatings manufacturer with the best of intentions, sometimes posing as a contractor, specifies a project with an owner or architect. The project then goes to bid and the lowest price gets the job. In order to make up for their low price/low profitability, the contractor cuts corners to return the job to profitability. Inevitably, the quality and overall excellence of the floor suffers. Techniquex is the preferred installer of DiamondStone products. DiamondStone's reputation is as important to Techniquex as our own. Techniquex specifies DiamondStone, and Techniquex employees install DiamondStone. Our installers are not compensated on profitability or speed. They have a bonus structure based on the overall satisfaction of the client through third-party surveys on completed projects, so pleasing you, the customer, is their greatest concern.
- 9. Will you provide references relevant to my industry?** Having installed well in excess of 100 million square feet, Techniquex has references in almost every market sector that resinous flooring serves. At Techniquex, you won't meet a high-pressure salesperson trying to sell you a bill of goods. You will meet a flooring design specialist with the knowledge necessary to introduce all the options to you, designing a custom-tailored flooring solution that meets your needs. In most cases, you can visit a similar facility to see that flooring system in action. Our customers have proven to be our best salespeople.
- 10. Why should I hire Techniquex?** Techniquex has been engineering high-quality, dependable flooring systems for our customers since 1984. We are the resinous flooring experts. We offer a broad range of flooring solutions not typically found with one contractor, an outstanding safety record, and a single-source, no-hassle warranty. Even our competitors have been known to hire us. Through our focus on continuous improvement, the floor we will take the most pride in is yours.
