New MCU

Example: PF0100 Power to Complete i.MX 6 System

System Power Fusion by Freescale™

Complete system power solution in 1 IC

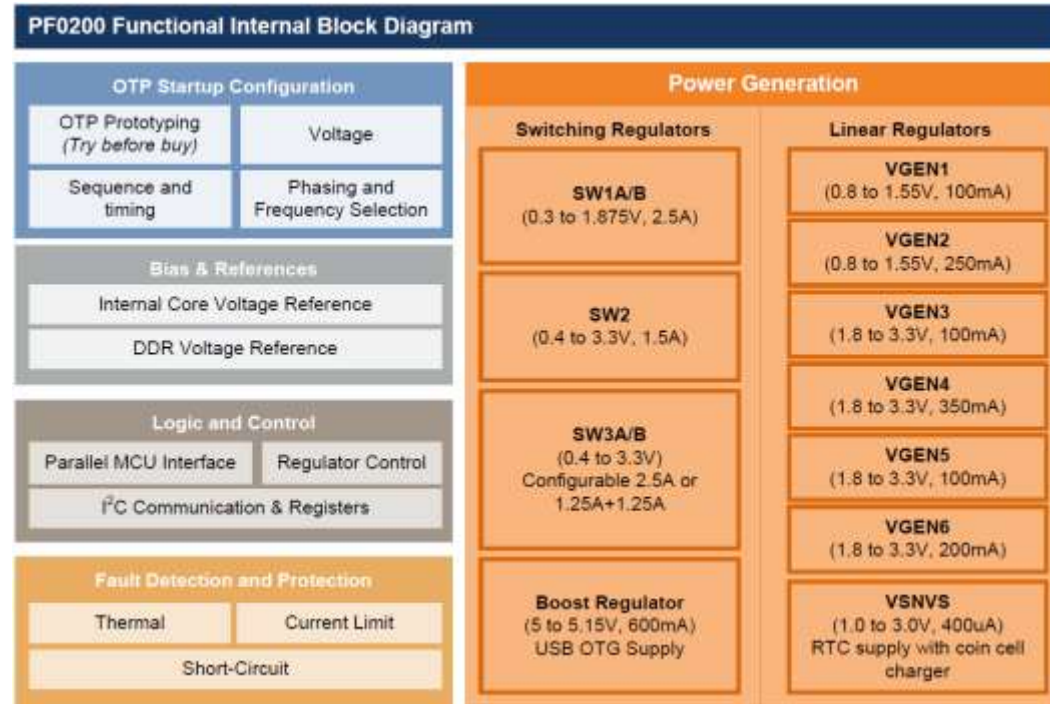

MMPF0200 : 12 Channel Configurable PMIC

Differentiating Points

- Compatibility with i.MX6 DL, S, SL, SX processors. BSPs under validation (patch released at the end of June).
- Boost regulator to 5.0 V out for USB
- OTP (One Time Programmable) memory to configure the start sequencing
- Custom pre-programmed output voltages, sequencing, and timing available
- Power control logic with processor interface and event detection

Product Features

- Vin 2.8V to 4.5V Supply
- 3 to 4 Channel configurable buck converters
- 6 User programmable LDO
- Forced PWM or automatic operation
- Boost regulator, Coin cell charger, DDR reference
- Programmable output voltage, current limit, soft-start, Fsw, OTP fault interrupt
- High power 8x8 mm, 56 E-QFN or WF-QFN

Lower featured version of the PF0100. SW1C and SW4 regulators are removed in MMPF0200 and SW2's current rating is reduced to 1.5A

Applications

- Tablets, eReaders, Smartbooks, Navigation
- IPTV, IP Phone
- Automotive infotainment
- Human-machine interface, Home Automation
- Portable Medical

Why Customer will buy Freescale's PMIC

Simplified Complexity

- **PMICs are defined alongside MCU development team**
 - Insure full **compatibility** with dedicated MPU/MCU's
- **Proven Solutions**
 - Complete **reference** designs with Android and Linux drivers
 - Development kits (SABRE, RIOT and more) for quick implementation
 - **From Freescale proven partner**
- **Highly Configurable with preprogrammed version**
 - Insure **Scalability** among i.MX family support
 - Factory preprogrammed version for specific i.MX

Energy Efficiency

- **The best light load efficiency on the market**
 - ~90% efficiency across the entire current delivery range
- **Dynamic Voltage Scaling** for power consumption optimization
- Soft Start Sequencing options for voltage rail start up
- **Best In Class Quiescent current for wearable series**

Functional Safety In Industrial

Key Applications

- **Transportation** Systems
- **Energy Conversion & Distribution (Inverters & Battery Management Safety Critical)**
- **Motor Control** Safety Critical (Robotics)
- Factory & Building **Automation**

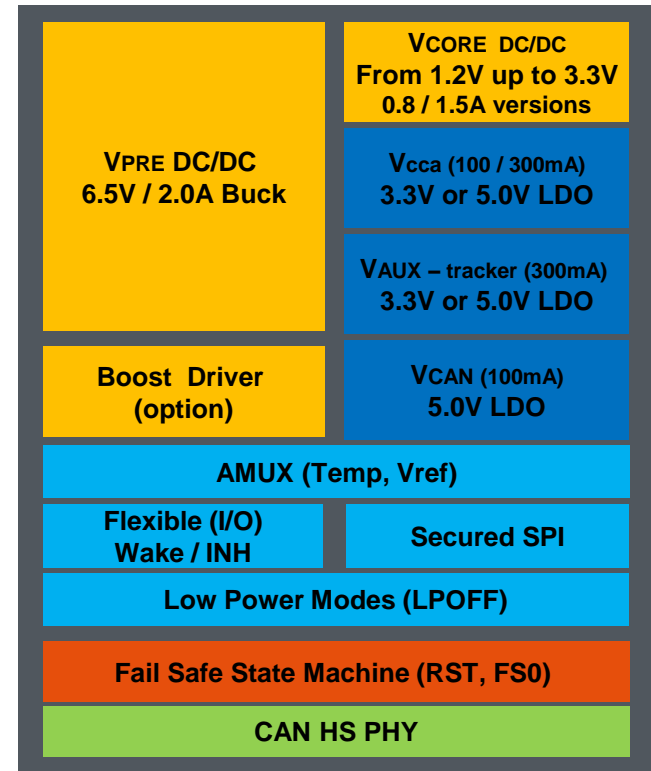

MC34FS6407 and FS6408 – SBC Key Features

Differentiating Points

- **Availability** : wide voltage operation range from 2.7V to 36V
- **Efficiency** of a Dual DC/DC converter topology
- **Safety** : Innovative architecture allowing **independent** monitoring of safety critical parameters
- **Scalable** family of products supporting a wide range of MCU and power segmentation architectures

Product Features

- **Bundles with** MCUs below 4 W of power dissipation
- Flexible DC/DC Buck pre regulator with optional Boost to fit with **Low Voltage requirements**
- Multiple supplies up to 1.5 A (up to 36 V operating voltage)
- Low Power Modes (**30 μ A**)
- Analog Multiplexer & Battery sensing
- **Independent fail safe state machine** supporting functional safety standards
- Secure SPI interface
- Robust CAN physical layer with superior EMI/ESD performance
- LQFP48 with Exposed Pad (7 x 7mm)

Applications

- Automation (Safe PLC, Robotics)
- Building control (Elevator, Gas furnace)
- Transportation (Mobile machine, Military)
- Medical (Infusion pump, monitoring)

Samples Available

Qualification March 2015

Interface and Input Monitoring

CAN Transceiver Market Dynamics

Energy Efficiency

- Minimize Standby Current without impact on Transceiver immunity
- CAN Partial Networking for energy savings – new ISO standard 11898-6 for CAN selective wake up

Functional Robustness

- EMC and ESD standardization
- Exceed EMC performance without common mode choke
- Improved safety and predictable behavior to secure communication

Increased Bandwidth

- Reduce SW download duration
- Increased Intersystem data exchanges require higher bandwidth
- CAN FD to increase bandwidth with limited architecture changes

Simplified Complexity

- Enhanced ESD protection to lower cost and improve quality
- Standard solutions with enhanced performance
- External lab certifications

MC33901/34901 **Chokeless** CAN High Speed Physical Layer

Differentiating Points

- **High Robustness:**
 - Exceeds EMC & ESD requirements **without added choke**
 - EMI compliant with **CAN FD 2M w choke**
- **Designed for EMC:** Low emission design combined with high immunity performance
- **Lowest quiescent current**, down to 8 μ A
- **Automotive and Industrial-Ready** : Specific P/N to support long-length CAN node interconnect

Product Features

- **Pin-to-pin compatible with standard**
- 5V and 3.3V I/O compatibility with auto-detection
- Industry-specific product options:
 - **Automotive:** Built-in “Tx Dominant Timeout” feature (MC33901)
 - **Industrial:** Built-in support for long-length and low baud rate networks (MC34901)

	Auto	Industrial
Wake Up	MC33901W	MC34901W
Standard	MC33901S	MC34901S
Mass Production		

CM0902 Dual CAN High Speed Transceiver

Robust, system-cost effective CAN High Speed Physical Layer offering low quiescent current while exceeding stringent EMC/ESD requirements, without added circuitry

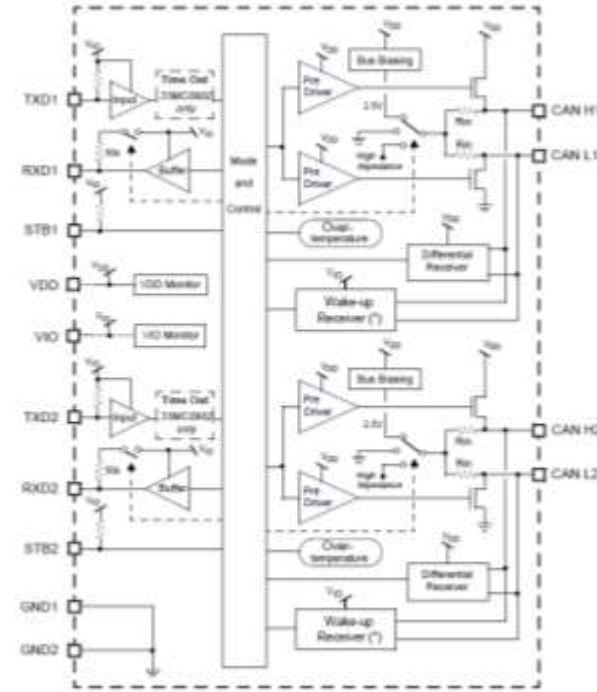

Differentiating Points

- **System Performance/Cost:** 500kbit/sec EMC compliant w/o Common Mode Choke
- **Scalable System Solution:** Seamless attach to Freescale MCUs
- **Robustness:** Automotive OEM certified (MC33CM0902)

Product Features

- Pinout and function compatible w/CAN ISO11898-2 and -5 standard products
- I/O (SPI) is compatible with both 5V and 3.3V MCU digital levels
- Vdd and IO voltage monitoring, ability to respond in 'fail-safe' manner
- Low power modes and wake up capability
- 15uA quiescent current in low power mode
- Robustness:
 - **ESD without choke** : +6kV ESD contact discharge according to IEC61000-4-2, 150pF-330ohms
 - **Noise Immunity without choke** : Meet 36dBm DPI without external protection and 39dBm DPI with additional capacitors
 - Bus pins protected against Automotive Transients
- Automotive (AEC-Q100) and Industrial versions available
 - Automotive: MC33CM0902 (Tx Dominant Timeout)
 - Industrial: MC34CM0902 (No Timeout - Low baud rate applications)
- SOIC-14 and DFN14eP (planned)

MCU

Typical Applications

- Auto Powertrain & Safety
- Motor control - Safety Critical
- Robotics
- Factory Automation

Main Differentiators

- Data rate, support both high data rate and low data rate in long distance
 - Competitors: minimum data rate >40kbps
 - Freescale: MC33901 ≥ 5 Kbps
- EMC performance
 - Freescale: Chokeless for 1Mbps, 2Mbps with Choke
- ESD performance
 - +/-8kV for contact discharge
- High impedance in un-power node
 - support hot plug-in/out

MC33999
MC33882
MC33879A

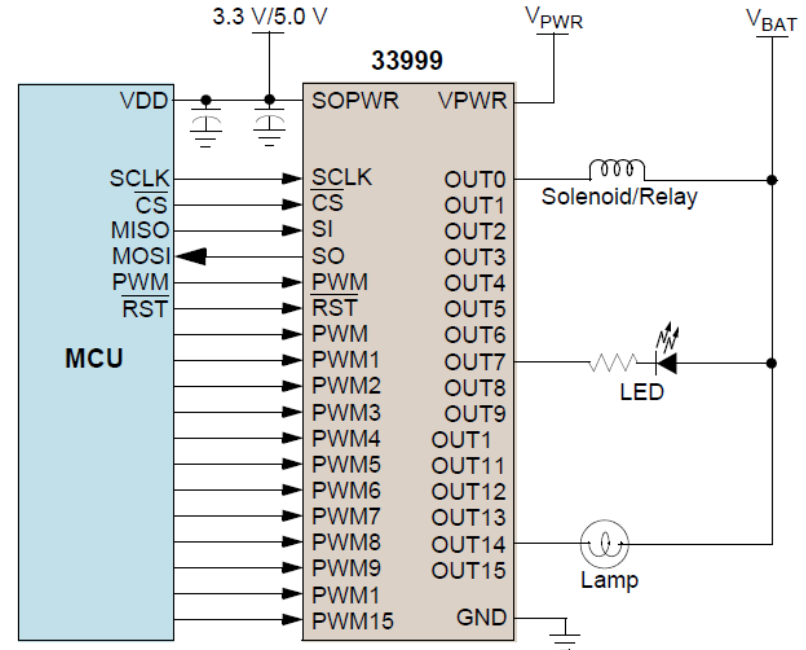

MC33999 - 16 Output Switch with SPI and PWM Control

Key Features

- RDS(ON) @ 25 degree C 0.55 Ohm
- Operating Voltage, VPWR 5.0 V – 27 V
- Operating Voltage, SOPWR 3.1 V – 5.5 V
- Outputs current limited (0.9 A) and voltage clamped (50V) for switching incandescent and inductive loads
- Output independent over temperature shutdown
- Programmed PWM of any combination of outputs plus parallel
- input control of eight outputs
- Output ON short-to-VBAT and OFF short-to-ground/open detection
- OFF open load detection current can be disabled for sensitive LED applications
- SPI diagnostic reporting

Applications

- PLC
- Valve control
- Medical Applications

0.65 mm Pitch
7.5 mm x 17.9 mm Body
4.6 mm x 4.6 mm Expose ad

C I/O - What is it?

Multi-function input/output IC that can be used as...

- An input signal conditioning IC with specialized features for monitoring switch contacts
- A device to wake up the system from a reduced power state based on several conditions
- An analog multiplexer
- A source of external sensor switched power
- An output device for driving LEDs and FETs
- Any combination of the above!

For low pin count MCUs it provides an efficient means to expand system I/O capabilities

For all systems, it can replace numerous ICs, discretes, and passives, greatly reducing board space

Features

- Automatically detects switch opening and closing
 - Up to 22 switch contacts
- 14 pins detect switch closures to ground
- 8 pins are programmable to
 - Detect either switch closures to ground or to power
- Wide switch input voltage range
 - -14 to VPWR, (40V Max)
- Wetting current to minimize contact corrosion
 - Selectable 16 mA or 2 mA
- Serial interface to controller or processor
 - Uses popular SPI protocol
 - Directly connects to either 3.3 or 5.0V SPI ports
- Robust inputs
 - 4.0 V ground offset protection
 - 5.5 to 26 volt operation

MC3x978 Configurable IO MC33978 (Automotive) MC34978 (Industrial)

Analog Multiple Switch Detect Interface for translating 22 IOs onto a single MCU SPI bus with configurable wetting/drive current and low power auto-wake modes

Differentiating Points

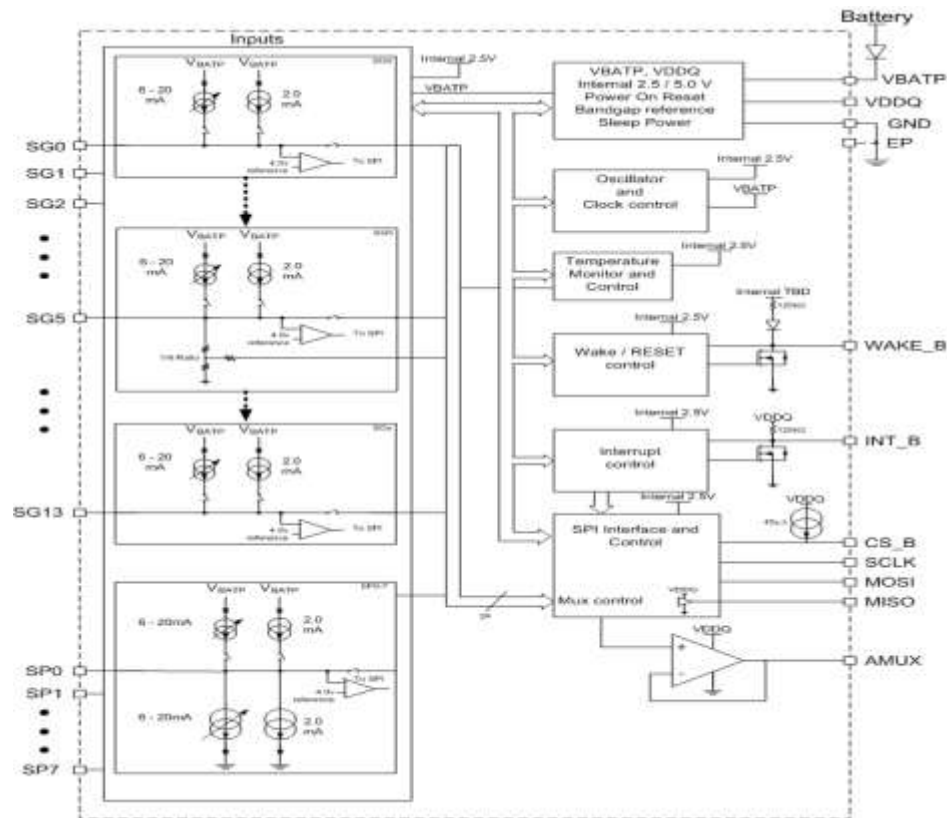

- Proven performance & robust IO ESD above 15kV for gun stress test
- Quiescent current of 30uA; < 1/2 that of competitors and 1/100th that of discrete solutions
- Operating voltage range: 4.5V-36V to meet auto load dump
 - 48% better than competition
- 5*5mm QFN coming, compared to 6*6mm for competition
- Integrated battery sense

Product Features

- 22 I/Os:
 - 14 switch-to-ground
 - 8 programmable - switch to battery or ground
- 24-1 analog multiplexer
- -14 to +40V switch input voltage range
- Programmable wetting/drive current from 2mA to 20mA
 - Current Source capable of driving white LEDs
- SPI Interface with enhanced register set
- Wake-up upon signal detection
- Integrated temperature sensor and Battery Voltage Sensing
- -40c to 125c temperature range

Preliminary Schedule

- Initial Samples/Prelim Datasheet: Available Now
- Final Samples/Begin Qualification: Nov '14
- Qualified Samples/Launch: 1Q '15

Applications

- Multiple switch detect in Body-Control modules
- Engine Control Modules
- Front-of-Dash Modules
- Wire Harness
- Junction Box
- White Goods

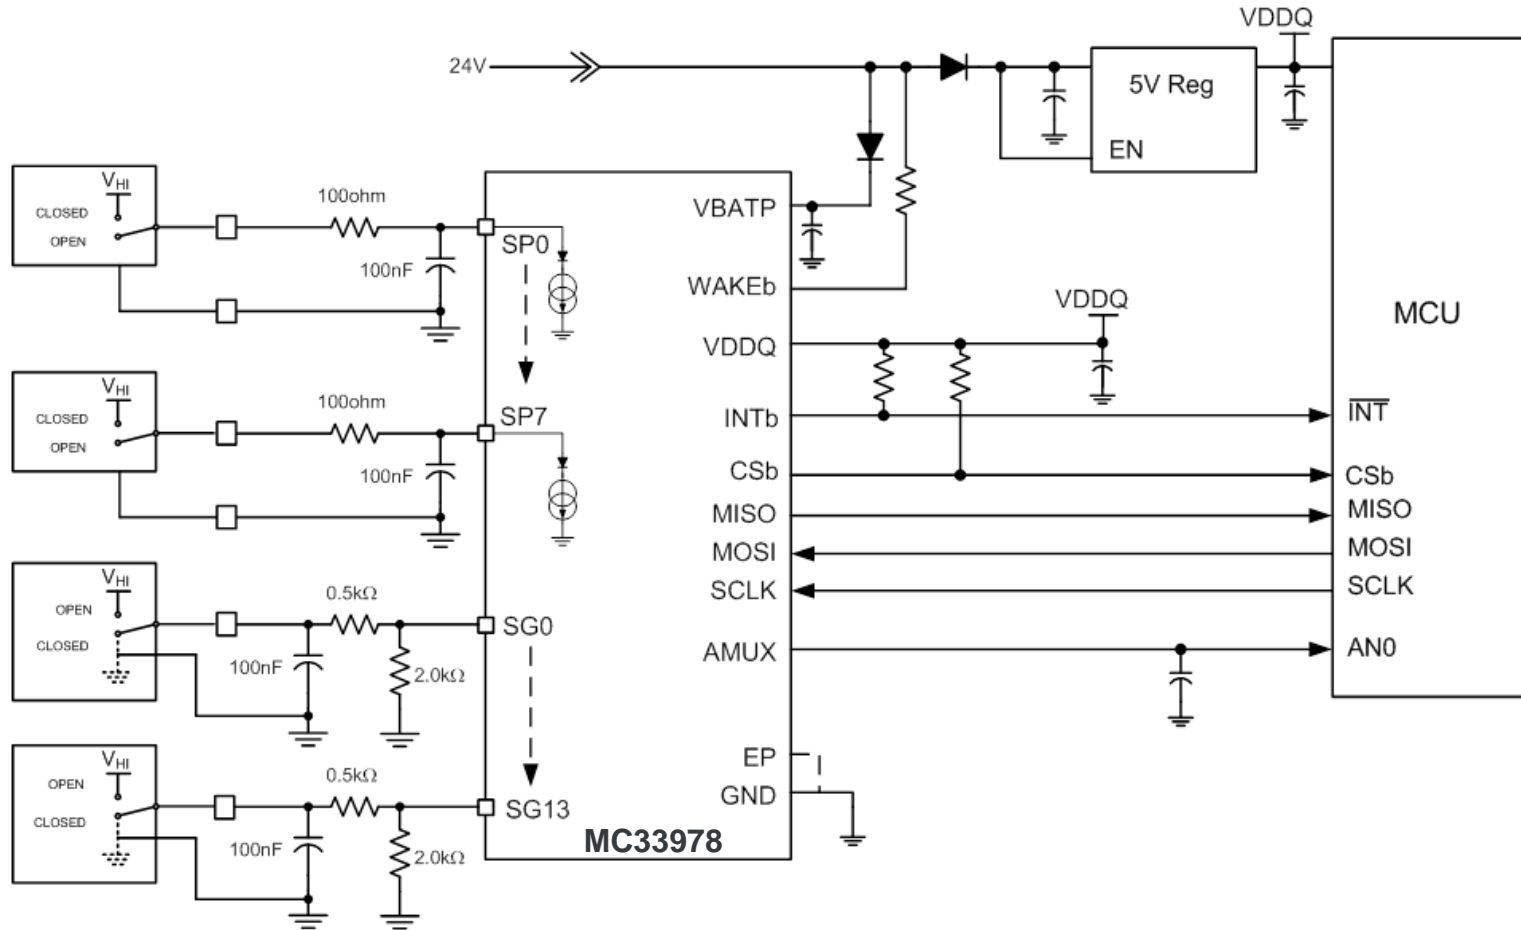

EK SUFFIX (PB-FREE)

32-PIN QFN (WF-TYPE)

MC33978 with 22 digital input channels

Analog Solutions for PLC

System Basis Chip

- Up to 36V input regulators for **MCU** and peripherals
- Functional Safety support features
- CAN Physical layer integrated

Configurable Power Management IC

- Voltage regulators for **MPU**, memory and peripherals
- Programmable voltage levels and timings (up to 14)
- MMPF series for i.MX, MC34VR500 for LS1

CAN Transceiver

- High EMC and ESD performance, enables choke protection removal
- TXD dominant time out disabled enables low baud rate & long cables

Configurable Octal Switch

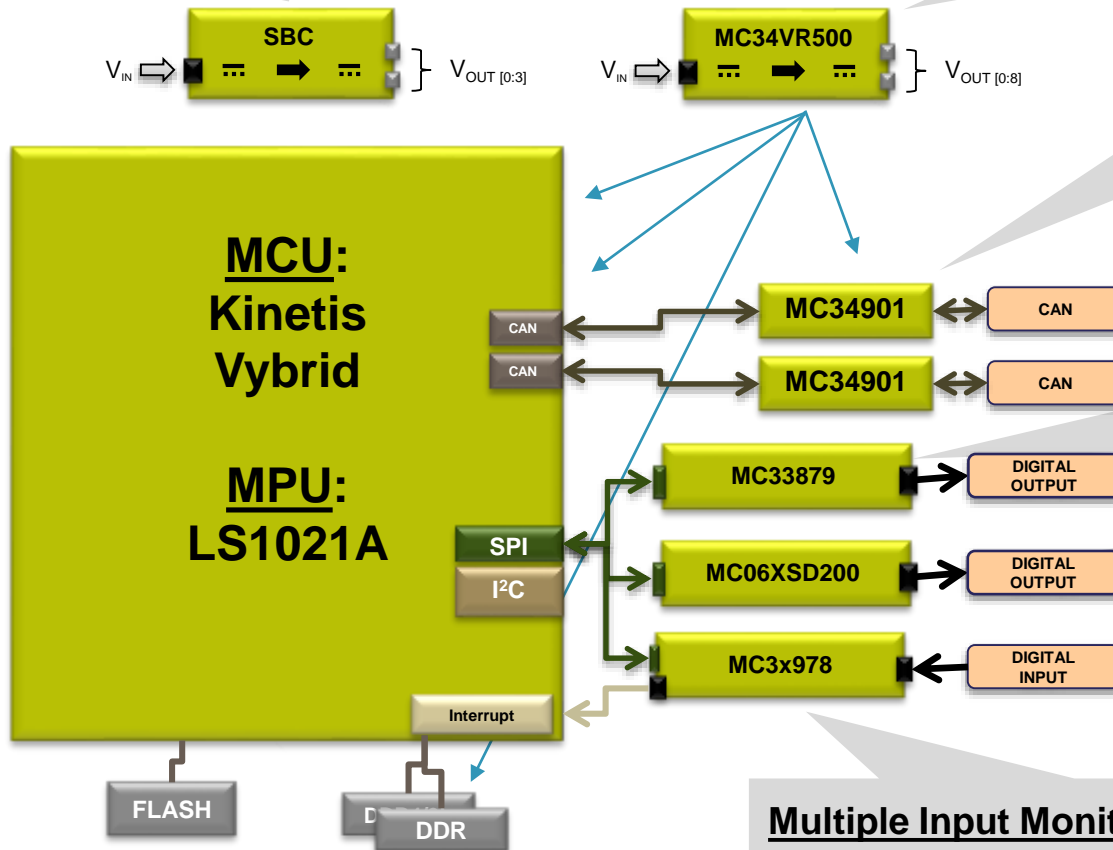

- 8 configurable high side or low side switches with SPI interface
- RDS(ON) of 750 mΩ at 25 °C

Low RDSon High Side Switch

- Integrated control with high number of protective and diagnostic functions
- 6 to 50 mΩ RDSon

Multiple Input Monitoring Device

- Monitor up to 22 switch contacts with current wetting; or LED driving capability
- Multiplexed analog input
- Enables lower system stand-by current

24 A / 36 V eXtreme Switch

MC06XSD200 – MC10XSD200 – MC16XSD200 – MC22XSD200 – MC50XSD200
Dual 6mΩ Dual 10mΩ Dual 16mΩ Dual 22mΩ Dual 50mΩ

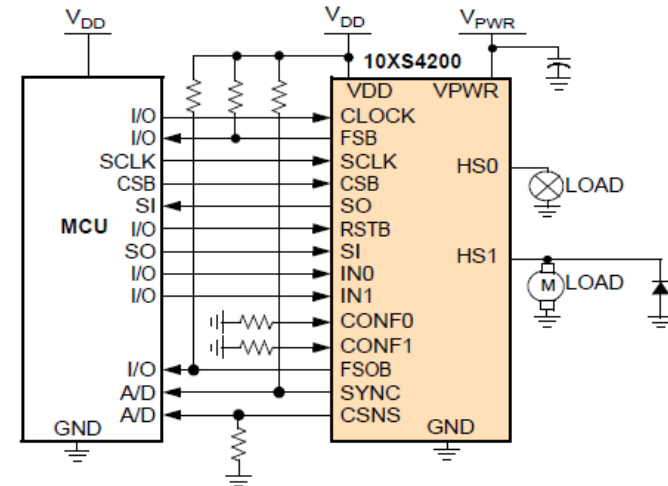

Scalable, programmable family of 24 A/36 V SPI-driven, dual-channel, smart high-side switches with lowest RDSon for up to a 30% board reduction

Differentiating Points

- **Robustness:** Unique over-current latch-off protection, full digital & analog diagnostic and protection features with embedded failsafe mode
- **Integration:** Unique daisy-chainable SPI control for dual low RDSon channels in a single package
- **Accuracy:** 5X better current sensing accuracy over temperature & supply voltage range with unique accurate temperature sensing capability
- **Scalable:** Compatible PCB foot print and SPI software driver among the 24 A/36 V product family
- **Lowest RDSon in Dual Configuration:** 20% smaller PCB due to lower power dissipation when using 12 A/channel or 24 A/dual in a thermally enhanced package

Product Features

- Dual 24 A/36 V high side switch with 6, 10, 16, 22 or 50 mW RDSon channels
- Normal operating range: 8.0 – 36 V, extended range: 6.0 – 58 V
- Flexible load management 1-24 A with possible parallel output operating modes
- Programmable dynamic threshold over current protection and over-temperature protection with programmable auto-retry functions
- 3.3 V and 5.0 V compatible 16-bit Daisy chainable SPI control
- $\pm 5^\circ\text{C}$ temperature and synchronous / asynchronous current ($\pm 10\%$) sensing
- Individually programmable internal/external PWM clock signals

Typical Applications

- Transportation 12 / 24V
 - 24 V Lighting and capacitive loads
 - Valves
 - DC motors
- Industrial
 - High current / highly inductive loads (solenoids)
 - DC Motor control
 - Factory automation

eXtreme Switch Target Applications – Up to 36V Operating Voltage

DC Motor

- Heater
- Electric doors
- Wiper
- Washer pump
- Low end robotic
- Machine inspection
- Vending machines
- HVAC
- Hospital bed controller

Inductive loads

- Solenoids
- Water and fluid control app
- Valves controllers for thermostats

Low Voltage H-bridge Family for DC and Stepper Motors

Differentiation

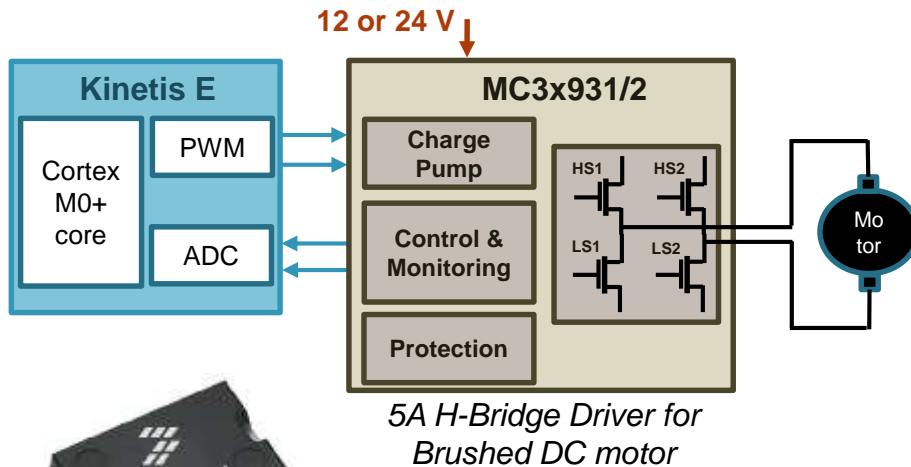

- 9 IoT actuator variants
- Operation from 2V to 15V
- Peak current 0.4A to 3.8A
- Independent PWM drivers
- PWM frequency up to 200kHz
- Single and dual configurations

Applications

- Digital camera
- Video conference
- DVD player
- Personal care products
- Medical

MC3x931/2 36V/5A 1x/2x H-bridge DC motor drivers

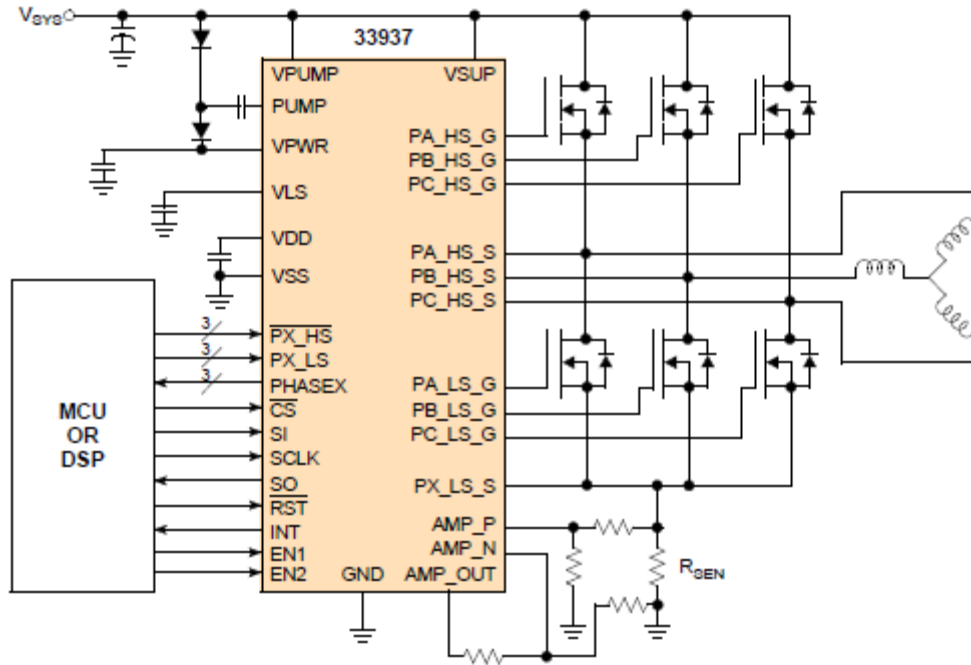

Differentiation

- PWM or SPIDrive control
- High current, high temp operation
- 2x lower thermal impedance
- High efficiency 125 mΩ RDSon
- Automatic thermal back-off for maximum drive operation
- Real-time load current monitoring
- >10A over current threshold

Applications

- Throttle control
- Exhaust gas recirculation
- Shock absorber / braking
- Tube motors
- Robotics / factory automation
- POS, ATM, vending kiosks

MC34937 3-phase Pre-drive IC

Features

- Up to 55V operating voltage range
- > 1.0 A peak gate drive current
- Wide SPI programmable dead time range
- Protection against transient spikes and reverse charge injection

Typical Applications

- Medical
- Power Tools
- Pumps / Fans

Product Options

-40 to 135°C

BMS and Battery Charger

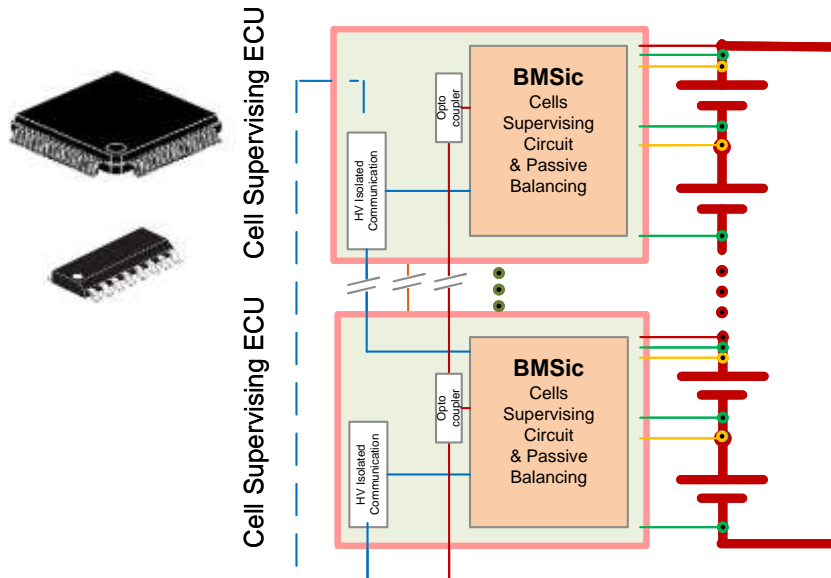

Battery Management Solutions

Intelligent Battery Sensors

- 12V Pb-Acid, 14V Li-Ion, HV junction box
- 4 cell with 52V measurement capability
- First IBS in production with CAN
- Lower average system current
- Configurable HW filters off-load MCU
- LIN conformance, robust EMC/ESD reduces BOM count and footprint

Battery Cell Controller

- 14 cell single chip 61V, multi-chip >800V
- ASIL-C w/ system diagnostics
- 2 Mbps transformer based isolation
- 1 shot cell impedance determination
- Topology flexibility

Milestones	MC33771	MC33664
Datasheet & EVB	Available	Available
Beta Samples	Jul-2014	Jul-2014
Release to Production	Jun-2015	Dec-2014

MC33771 14 Cell Li-ion Battery Cell Controller

Scalable ISO26262 ASIL-C compliant controller for 48 to >1000 V packs with 2 Mbps transformer coupled daisy chain transceivers, cell balancing FETs and current sensors reducing BOM cost 50%

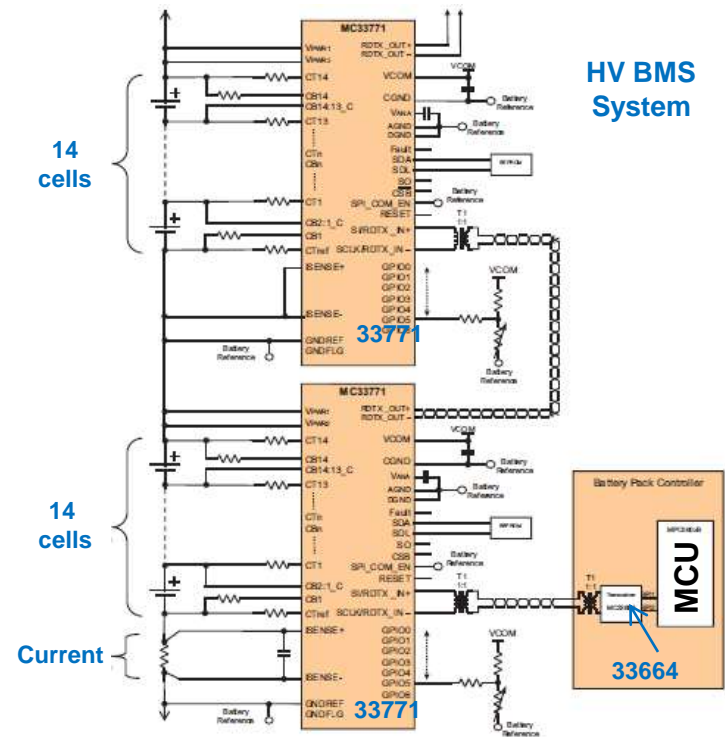

Differentiating Points

- **Single chip** 48 V battery control scalable to > 1000 V
- **ASIL-C** functional safety compliant at 50% system BOM cost
- **300 mA** cell balancing transistors and 0.5% current sensors
- **2 Mbps** differential communication transceiver
- >2.5x higher transformer coupled daisy chain isolation (3750 V)
- Companion communication interface IC for MCU SPI isolation
- **2 mV** voltage measurement accuracy
- 65µs one shot synchronized cell impedance determination
- **Fast data acquisition:** 3.6 ms for 96 cells, 4.5 ms for 112 cells
- Functional verification & **diagnostics** supporting ISO26262
- Automotive robustness: ESD, EMC, **Hot plug**, AEC Q-100

Product Features

- **9.6 V ≤ VPWR ≤ 61.6 V** operation, 70V transient
- **14x** differential cell voltage + stack voltage measurement
- **7x** ADC + GPIO + temperature sensor Inputs
- Low power modes
- 64 pin QFP package
- Low-level drivers to simplify SW development

Typical Applications

- Automotive hybrid and electric vehicles
 - 48 V BMS and HV BMS (>1000V)
- Industrial
 - Energy storage systems (ESS)
 - Uninterrupted power supply (UPS)
 - E-bikes, E-scooters

- Extended Temp Range: 105C

High Bandwidth
Analog

FXLS8471

3-Axis High-Performance Digital Accelerometer (SPI Interface)

Differentiating Points

- Output noise (99 ug/rHz)
- Offset and sensitivity accuracy
- Resolution of 0.25 mg/count

Product Features

- 1.95 V to 3.6 V supply voltage
- ± 2 g/ ± 4 g/ ± 8 g dynamically selectable
- Output data rate (ODR) from 800 Hz to 1.563 Hz
- SPI/I²C digital output interface with interrupts
- Embedded orientation (portrait/landscape)
- Embedded high pass filter
- Embedded 32 sample FIFO

Typical Applications

- Laptops: HDD drop protect
- Washing machine: out of balance detect

FXLS8471Q

14-bit output, SPI
High Pass Filter with DSP functions
Configurable Orientation detect
FIFO

Package

3 x 3 x 1 mm QFN, 0.5 mm pitch

FXAS21002C

3 Axis Gyro with Market leading power consumption (over 40% better than the leading competitors)
Part of Freescale's 9-axis Sensor Fusion Solution.

Differentiating Points

- **Best-in-class power performance: 2.7mA (Active), 1.6mA (Ready), 2uA (Standby)**
- Complete sensor fusion enablement suite

Product Features

- Enhanced Selectable Full Scale ranges: **+/-250, +/-500, +/-1000, +/-2000**
- Fast Transition from Standby to Active Mode (**60 ms**)
- Expanded Output data rates (ODR) from **12.5 Hz to 800Hz**
- Zero Rate Change over temperature: **$\pm 0.02 \text{dps}/^\circ\text{C}$ (XY), $\pm 0.01 \text{dps}/^\circ\text{C}$ (Z)**
- Improved Noise: Angular Random Walk = **0.025 dps/rt(Hz)**.
- Angular velocity resolution **$< 0.2^\circ/\text{s}$**
- Programmable interrupts, Power saving features
- 1.95-3.6V supply voltage

Typical Applications

- Controllers: Remotes, Games
- Ruggedized Industrial and Medical Handhelds and Tablets
- Sports Monitoring, Remote control toys, Robots

Package

4x4x1mm QFN, 0.5mm pitch

MPL3115A2

Precision Digital Altimeter

Differentiating Points

- Internally compensated, software is not needed
- Direct reading pressure in Pascals and altitude in meters

- On-board intelligence

Product Features

- Altitude resolution : < 1 foot / 0.3 m
- Pressure resolution: 1.5 Pa
- Pressure range: 20 – 110 kPa
- Calibrated pressure range: 50 – 110 kPa
- 1.95V to 3.6V supply voltage
- Variable output sampling rate (OST) up to 140 Hz
- Current Consumption:
 - Standby mode: 2 μ A
 - Low-power mode: 8.5 μ A at 1 Hz
- I²C digital interface

Typical Applications

- High Accuracy Altimeter
- Smartphones / Tablets
- GPS Enhancement for Location Based Services

Package

3 x 5 x 1.1 mm LGA

Availability

Now

FXPQ3115MV

I2C Submersible Precision Altimeter

Differentiating Points

- Media resistant to water and salt water; ideal for submersible applications.
- Internally compensated, software is not needed
- Direct reading pressure in Pascals and altitude in meters
- On-board intelligence

Product Features

- Altitude resolution : < 1 foot / 0.3 m
- Pressure resolution: 1.5 Pa
- Pressure range: 20 – 110 kPa
- Calibrated pressure range: 50 – 110 kPa
- 1.95V to 3.6V supply voltage
- Variable output sampling rate (OST) up to 140 Hz
- Current Consumption:
 - Standby mode: 2 μ A
 - Low-power mode: 8.5 μ A at 1 Hz
- I²C digital interface

Typical Applications

- Waterproof fitness watches and activity monitors
- High accuracy altimetry
- Swim tracking equipment

Package

3 x 5 x 1.5 mm LGA

Samples: Q2, 2015
Production: Q4, 2015

MPL3115A2 and FXPQ3115 Target Applications

Pedometer

Sport Bicycle

Fishing Barometer

Aeromodelling

Flying Saucer

Sport Watch

**Altimeter
Barometer
Function**

Analog and Sensor Summary

- Bridging real world physics to connected processors
- Preferred partner for complete embedded system solutions
- Leveraging MCU attach to diversify customers and markets
- Expanding strong automotive position
- Extending leadership with differentiated products
