Edge Computing – What, Why and Where?

Edge computing allows data to be processed closer to the source of data before sending it to the cloud. This improves response time and saves bandwidth.

Primary drivers of Edge computing

Growth of IoT - Aggregation, control & analytics

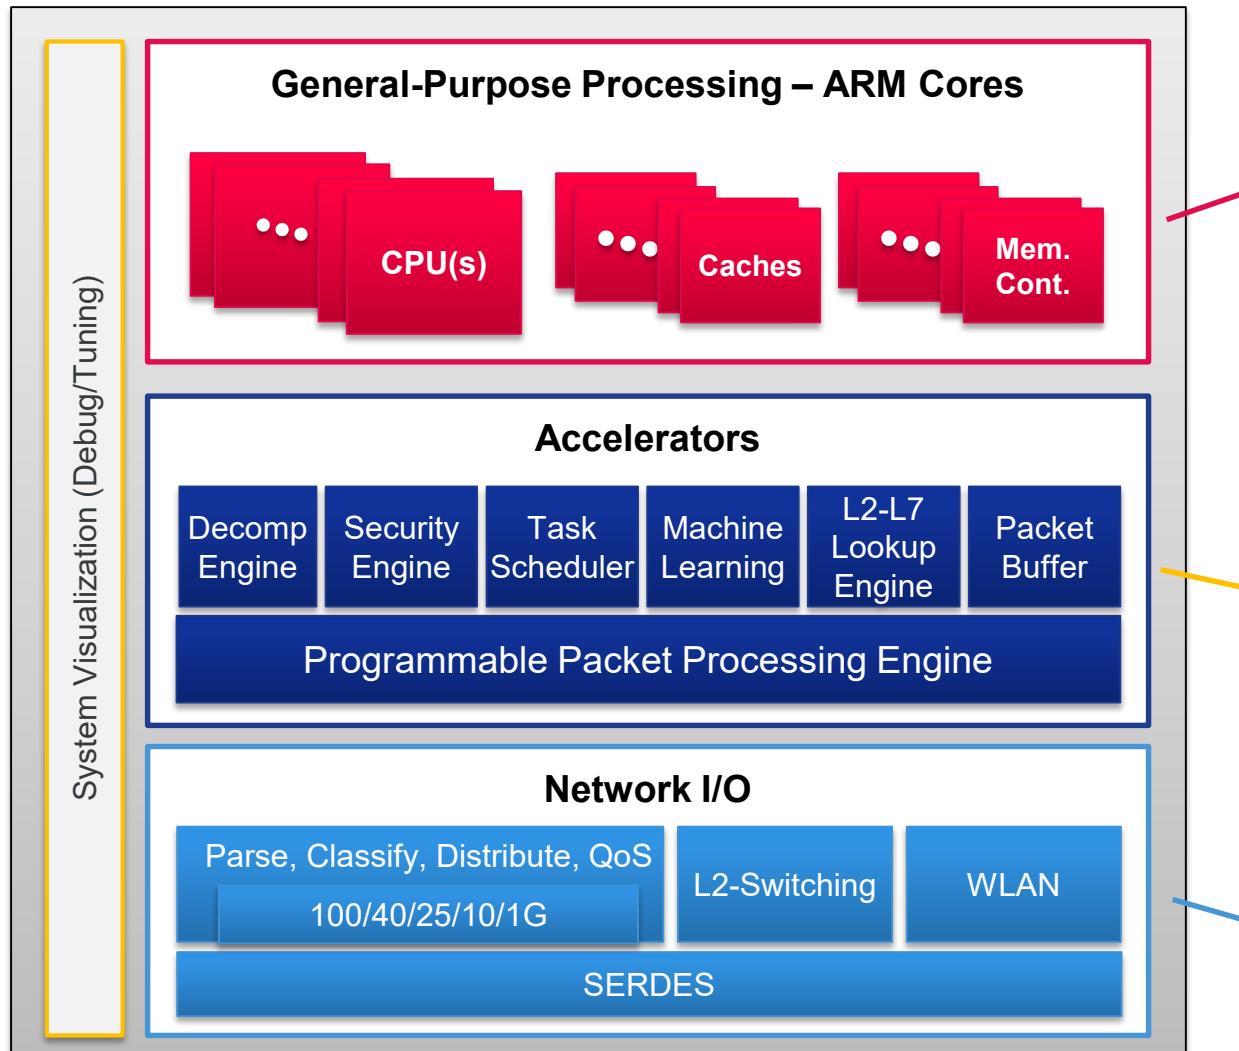

Increase in “intelligent” applications (AI/ML) – Real-time processing

On-premise applications – security and privacy

Acceleration and Cores on a Single Chip

- Powerful 64b ARMv8 cores – comparable to x86
- Layer 4-7 processing, control, mgmt.
- Rich Linux Distros, DPDK etc.
- Virtualization with VMs, Containers.
- 2-16 cores upto 2.4 Ghz

- C programmable Packet Engine
- Layer 2-4 processing, IPsec, Firewall.
- 5-10x better performance/watt
- 10-100+ Gbps Packet processing
- 10-100+ Gbps Crypto

- 8 x 1GE to 2 x 100GE ports
- Integrated L2 switching

LS/LX/LA-series

P/T-series

A Broad and Scalable Edge Computing Portfolio

- All LS-series processors have rich set of IO – USB, PCIE, SATA, GPIO, I2C, SPI, UART
- All support Trust Architecture for platform security
- Support both embedded and PC Linux distros
- Support industrial temperature ranges
- Support long lifecycles

Large-scale video/image processing, data aggregation, backhaul

LS2084A

- Cortex-A72
- 4-8 cores
- 2.0GHz
- 8 x 10GE
- 20-35W

LX2160A

- Cortex-A72
- 8-16 cores
- 2.2GHz
- 10/25/40/100 GE
- 31W

LS1028A

- Cortex-A72
- 2 cores
- 1.6GHz
- 4-9W
- *Integrated TSN switch, GPU*

LS1043A

- Cortex-A53
- 2-4 cores
- 1.6GHz
- 1/10G Ethernet, USB, PCI
- 5-10W

LS1046A

- Cortex-A72
- 2-4 cores
- 1.8GHz
- 1/10 G Ethernet, USB, PCI
- 10-12W

LS1088A

- Cortex-A53
- 4-8 cores
- 1.6GHz
- 1/10 G Ethernet, USB, PCI
- 8-16W

Video/image processing, large-scale analytics, TSN ethernet, Gateway applications

LS1012A

- Cortex-A53
- 1 core
- 1GHz
- 1-2W
- Ethernet, USB, PCI

LS1021A

- Cortex-A7
- 2 cores
- 1GHz
- 2W
- Ethernet, USB, PCI

Data acquisition, analytics, monitoring, remote control

Supply Longevity

Longevity

NXP Industrial Application Processors

- 10 and 15-year supply longevity options
- Formal program with products listed at www.nxp.com/productlongevity

Industrial applications require product longevity

- Long product lifecycles
- Special product certification required

Extreme Operating Conditions

Extreme
Operating
Conditions

- **10-year product life** with continuous operation
- Product Life Application Notes
- Extreme **temperature conditions**
 - -40° C cold start
 - 70-85° C ambient operating conditions
 - Up to 125° C junction temperature
- Low power consumption for **fanless designs**
- Small footprint for **space-constrained designs**

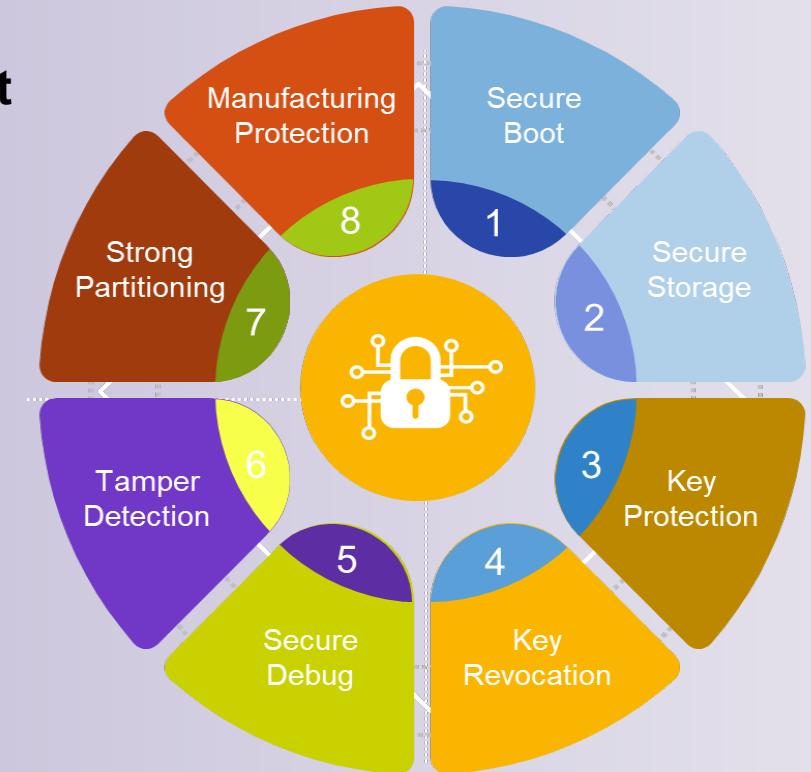

Security

Security

Covering every system vulnerability of the Product Life-Cycle

- Design – Hardware, IO, Storage: Trust Architecture
- Manufacturing – Key Generation, Provisioning, Updates: Secure Provisioning Tool
- Software – Operating System, Applications, Permissions: Trusted Linux
- Connectivity – Remote Access, Communications: Network Security Suite

A Broad and Scalable Edge Computing Portfolio

- All LS-series processors have rich set of IO – USB, PCIE, SATA, GPIO, I2C, SPI, UART
- All support Trust Architecture for platform security
- Support both embedded and PC Linux distros
- Support industrial temperature ranges
- Support long lifecycles

LS1046A at a Glance

Power efficient quad-core A72 processor, ~8W typical power, integrating:

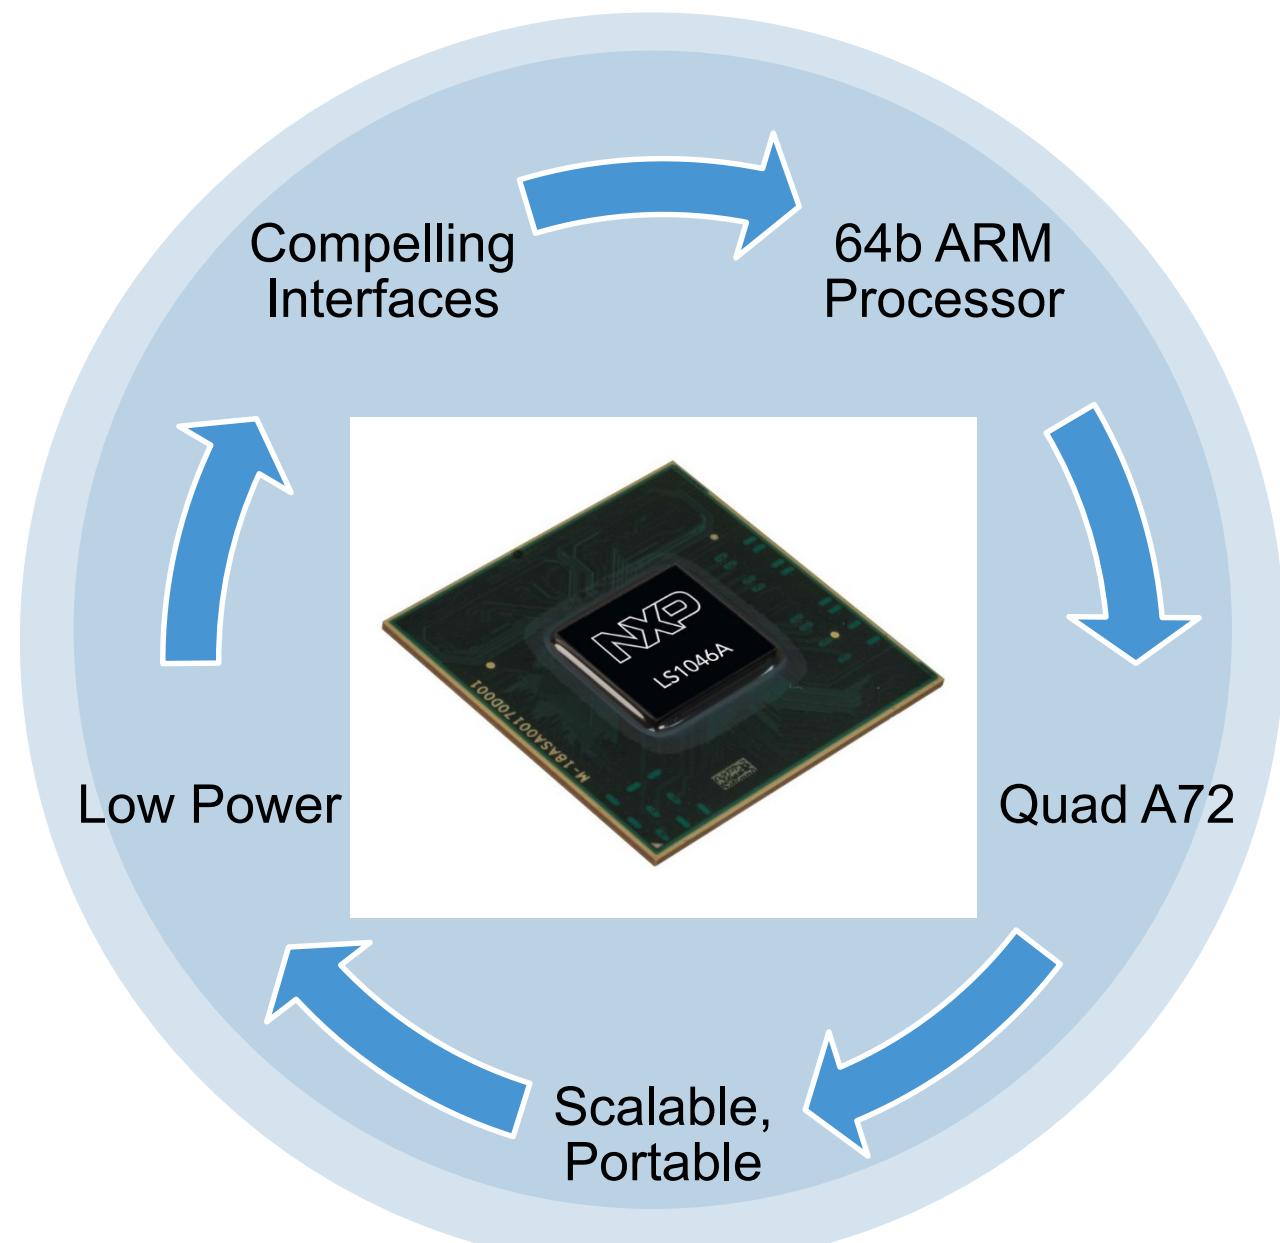

- 2x 10GbE + 1x 2.5GbE + 5x 1GbE
- 3x PCIe Gen 3.0
- 1x SATA 3.0
- 3x USB 3.0

Seamless performance scaling from dual-A53 to quad-A72 processor

- Pin compatible with LS1 portfolio
- Software portability with same offload architecture
- 15 years longevity

Suitable for high-performance networking applications for:

- Wireless & gateway solutions
- Industrial & storage solutions
- Security & UTM solutions

Layerscape LS1046A at a Glance

High Performance A72 Cores for Broad Applications Across the Embedded Networking Space

Enterprise Access Points

- ✓ 3xPCIe 3.0 + 3xUSB 3.0
- ✓ Proven with variety of radio partners
- ✓ Maximum headroom (upto 70%) for 11ac, 11ad (60GHz) wifi

Industrial Automation

- ✓ High performance/watt at 1.8GHz
- ✓ Spread of compute performance b/w pin compatible LS1023/43/26/46A
- ✓ 3xPCIe 3.0 + 3xUSB 3.0 and I/Os for sensors

Virtualized CPE (vCPE)

- ✓ 2x 10GbE + 1x 2.5GbE + 5x 1GbE
- ✓ 8W fanless design
- ✓ DPDK support, UEFI installation
- ✓ KVM, Docker container support

**Best CPU headroom in its class
for Smart Edge, virtual Branch
Router & WLAN applications**

High Performance Power Efficient SoC

- Quad ARM A72 CPUs, 64b, up to 1.8GHz
- Future Proof, Low Power Memory DDR4 64b support
- Extensive Hardware Virtualization
- Secure Boot

Advanced Packet Processing

- Packet Parse/Classify/Distribution engines
- Lossless flow control & granular traffic management
- Up to 7.9Gbps of crypto acceleration

Fast, Flexible Network Interfaces

- Up to 4x GbE with 2.5G options and dual 10GbE XFI for extreme connectivity
- 3x USB 3.0 interfaces for highest speed LTE, Storage & Peripheral options

Highest Processing Efficiency

- Up to 45K Coremarks at 8 watts typical
- Up to 20Gbps of IP Forwarding

Scalable and Portable

- Pin compatible with the LS1 family of processors (LS1043A/LS1088A)
- Software portability with same offload architecture

TARGET MARKET SEGMENTS

Broad Applications Across the Embedded Networking Space

Enterprise Access Points

- ✓ 3xPCIe 3.0 + 3xUSB 3.0
- ✓ Proven with variety of radio partners
- ✓ Maximum headroom (upto 70%) for 11ac, 11ad (60GHz) wifi

Network Attached Storage

- ✓ ARMv8 CPU w/ TrustZone
- ✓ 3xPCIe 3.0 + 3xUSB 3.0
- ✓ 64-bit DDR4 controller
- ✓ SATA 3.0

Virtualized CPE (Intelligent Edge)

- ✓ 2x 10GbE + 1x 2.5GbE + 5x 1GbE
- ✓ 8W fanless design
- ✓ Linux 4.4 LTS
- ✓ DPDK support, UEFI installation
- ✓ Virtualized access to crypto acceleration
- ✓ KVM, Docker container support

Robotics

- ✓ High performance/watt at 1.8GHz
- ✓ Spread of compute performance b/w pin compatible LS1023/43/26/46A
- ✓ 3xPCIe 3.0 + 3xUSB 3.0 and I/Os for sensors

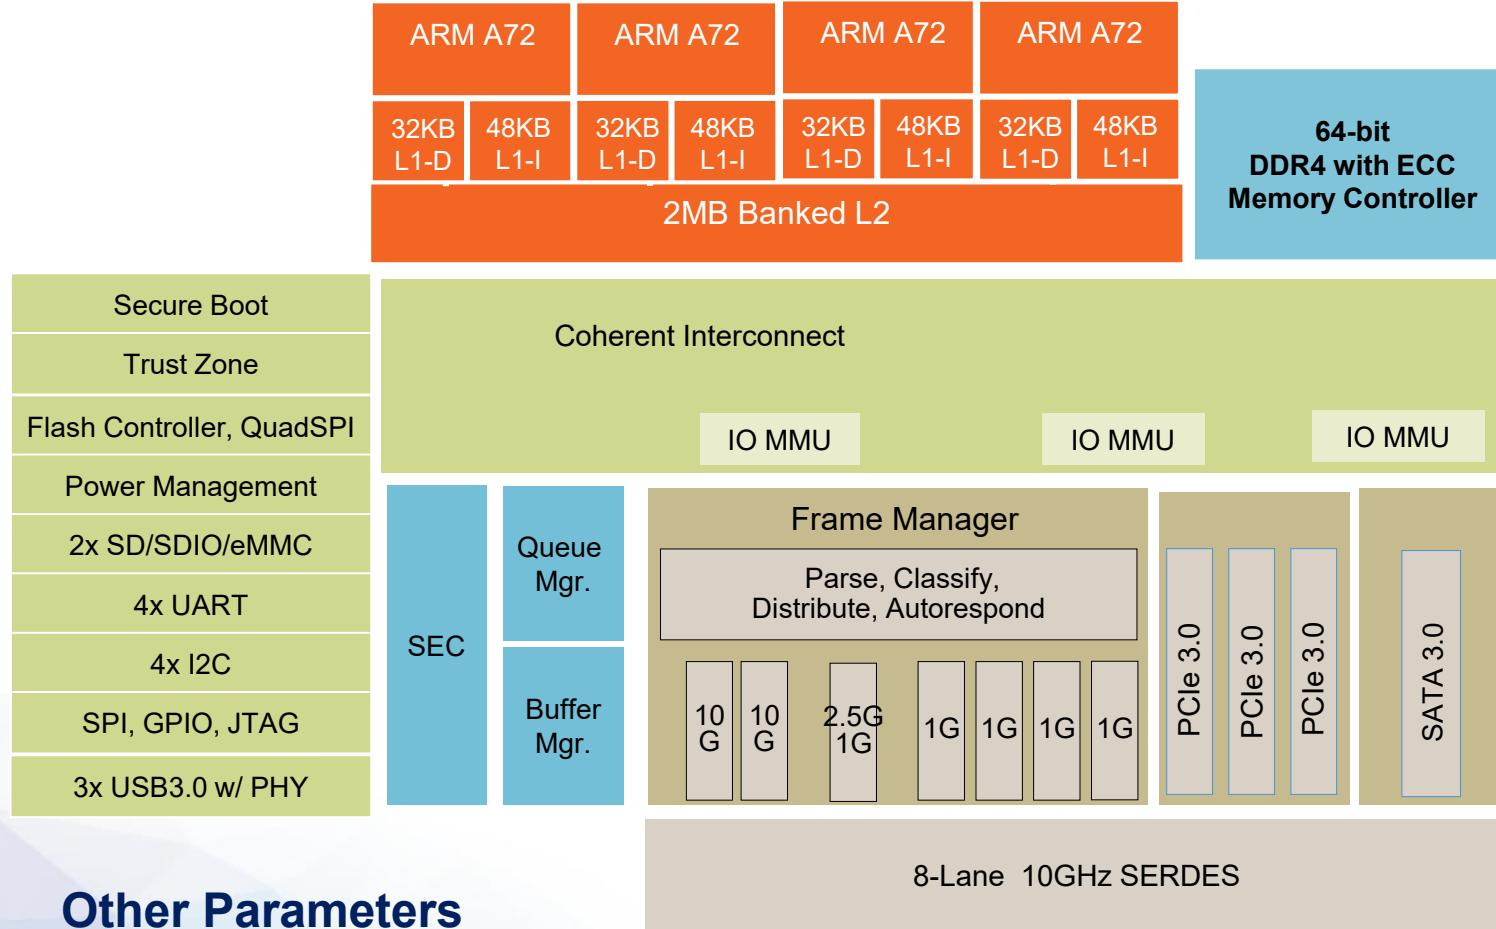

Substation Automation

- ✓ High performance/watt at 1.8GHz
- ✓ 1x 2.5GbE + 5x 1GbE Ethernet
- ✓ Networking offload with dedicated engine for RTUs

LS1046A

Optimized for highest compute power

Other Parameters

- Package:
-780 pin 23x23mm, Lidded FCBGA

In production now

Core & Memory Subsystem

- 4x ARM Cortex A72 up to 1.8GHz
- 2MB total L2 cache
- 64-bit DDR4 up to 2.1GT/s

Interfaces

- Three PCIe Gen3 controllers (x4, x2 and x1)
- 1x SATA 3.0
- 3x USB 3.0 with PHY
- 2x SD3.0/SDIO/eMMC 4.5

Network IO

- 2x 10GbE + 5x 1GbE + 2x 2.5GbE
- XFI, SGMII, RGMII, QSGMII
- Proven Packet Parse/Classify/Distribute
 - VxLAN, IPSec, GRE, CAPWAP, DTLS Offload
 - Lossless Flow Control

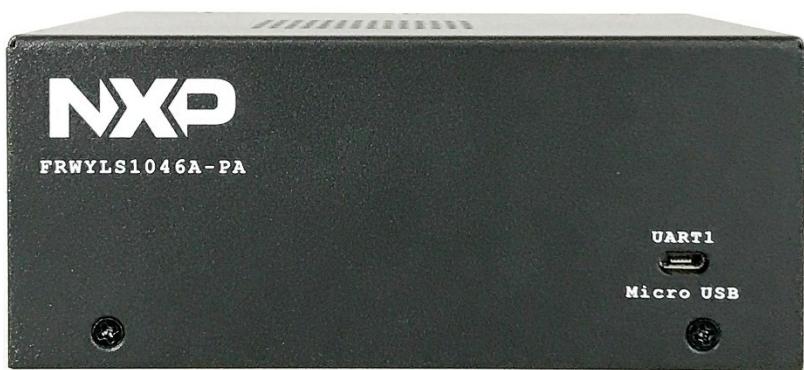

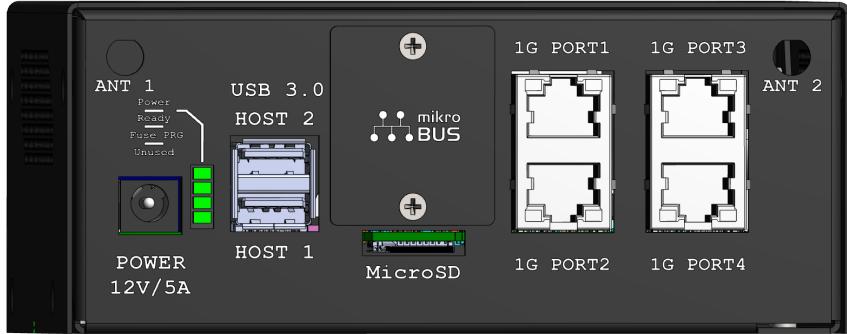

Datapath Acceleration

- SEC- crypto acceleration
 - Up to 7.9Gbps of Crypto processing
- Data path Acceleration Architecture 1.x

Software

- LSDK 1806 – Ubuntu based components
 - Open source and upstreamed

FRWY-LS1046A-AC : Edge Compute Platform

Processor

- LS1046A: Arm Cortex A72, 64-bit CPU
- Up to 1.6GHz Quad-Core
- 32KB L1 data cache / 48KB L1 instruction cache
- 2MB L2 Cache

Power Management

Connectivity

- 12V / 5A Power connector
- 4x Gigabit Ethernet
- 2x M.2 Type E sockets (Wi-Fi, LTE, AI/ML)
- 2x USB 3.0
- Mikro-Click for expansion (NFC, BLE/ZigBee, LoRa)
- Headers for I2C, SPI, Clocks, Interrupts, GPIO
- MicroSD slot

Memory

- 4GB DDR4 with ECC
- 4GB NAND Flash
- 64MB QSPI Flash

Debug

- Micro USB debug port

General

- LED's (Power, Ready, Fuse Prog)
- LED's Ethernet Link, Activity

Demonstration Kits

- FRWY-LS1046A-AC
- FRWY-LS1046A-PA

FRWY-LS1046A Product Options

FRWY-LS1046A-PA - \$395 Resale

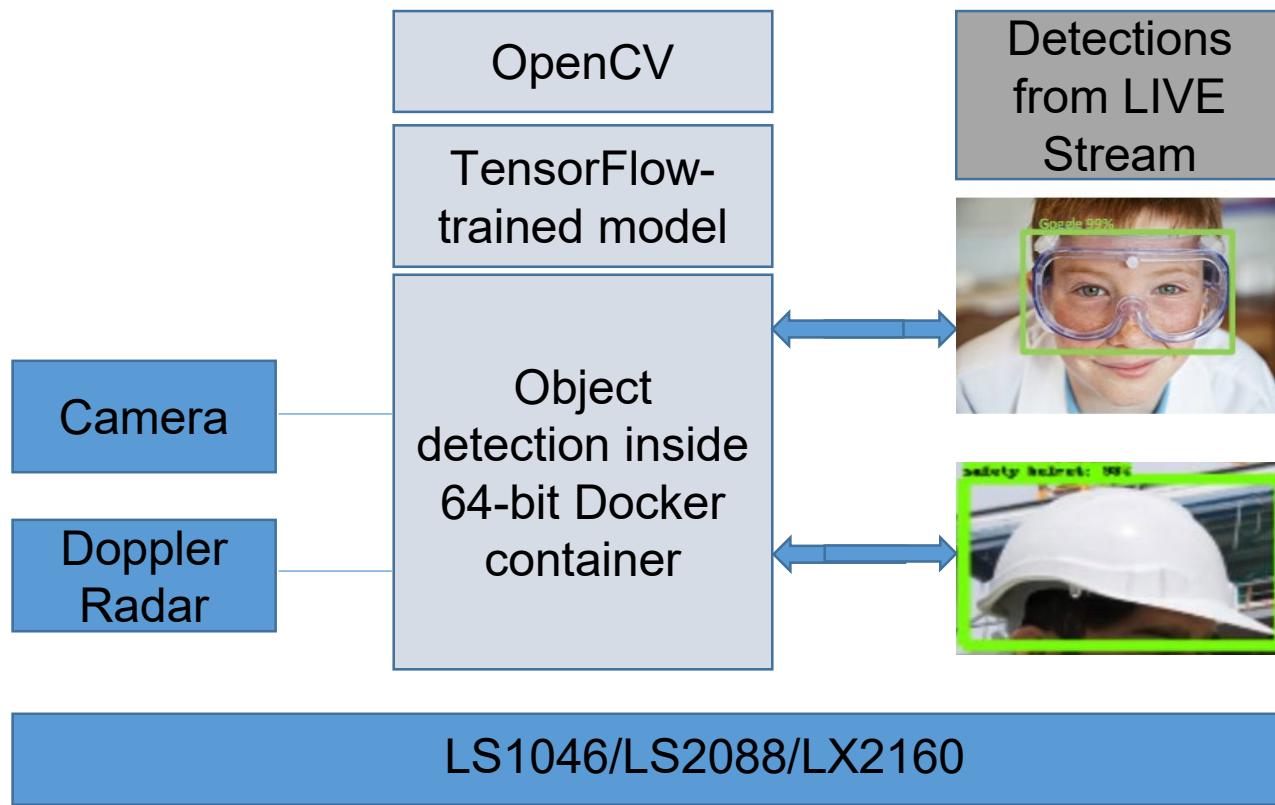

FRWY-LS1046A-AC - \$495 Resale

Just bought a usb camera

Industrial Safety Demo Using NXP Layerscape

- Demonstrates AI for detection of PPE in safety zone
- Doppler radar sets safety zone
- Cameras capture operators
- AI/ML software using TensorFlow and OpenCV and custom training data detect helmet and goggles

Connect my mobile or lap top to LS1046 freeway board via Wifi

The screenshot shows the FRWY-LS1046A application interface. At the top left is the NXP logo and 'version 1.0.4'. To the right are tabs for 'FRWY-LS1046A' (selected), 'Video Vault', and a red button for 'Detailed CPU Analysis'. On the left sidebar, there are icons for 'CPU Performance', 'Data Analytics', 'Machine Learning/Video Analytics' (circled in red), and 'Video Vault'. The main area displays six demo modules: 'FRWY-LS1046A Platform for Edge Computing' (with a network diagram icon), 'FRWY-LS1046A CPU Performance Benchmarking' (with a graph icon), 'FRWY-LS1046A Cold Storage Data Analytics' (with a line chart icon), 'FRWY-LS1046A Accelerometer Sensor Data Analytics' (with a sensor diagram icon), 'FRWY-LS1046A Object Detection And Facial Recognition' (with a face detection icon), and a partially visible 'Video Vault' module.

Overview:

- Video Vault show case different demo videos stored on LS1046FRWY board (SD card).
- User can show case quick demos through video vault.

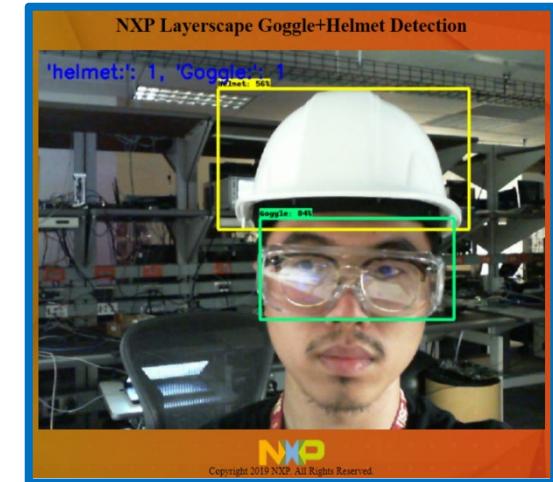

Demo 3.1: Face Recognition Using NCNN

- **Face Recognition** using NCNN shows Machine learning and AI capabilities of FRWY-LS1046A.
- Instant training and addition of new user's face without depending on cloud. Convolutional Neural Network is used.
- ML/AI capabilities powered by TensorFlow and OpenCV which provide ease of use and smooth deployment and development options to users.

Demo 3.2: Industrial Safety and Security Using TensorFlow

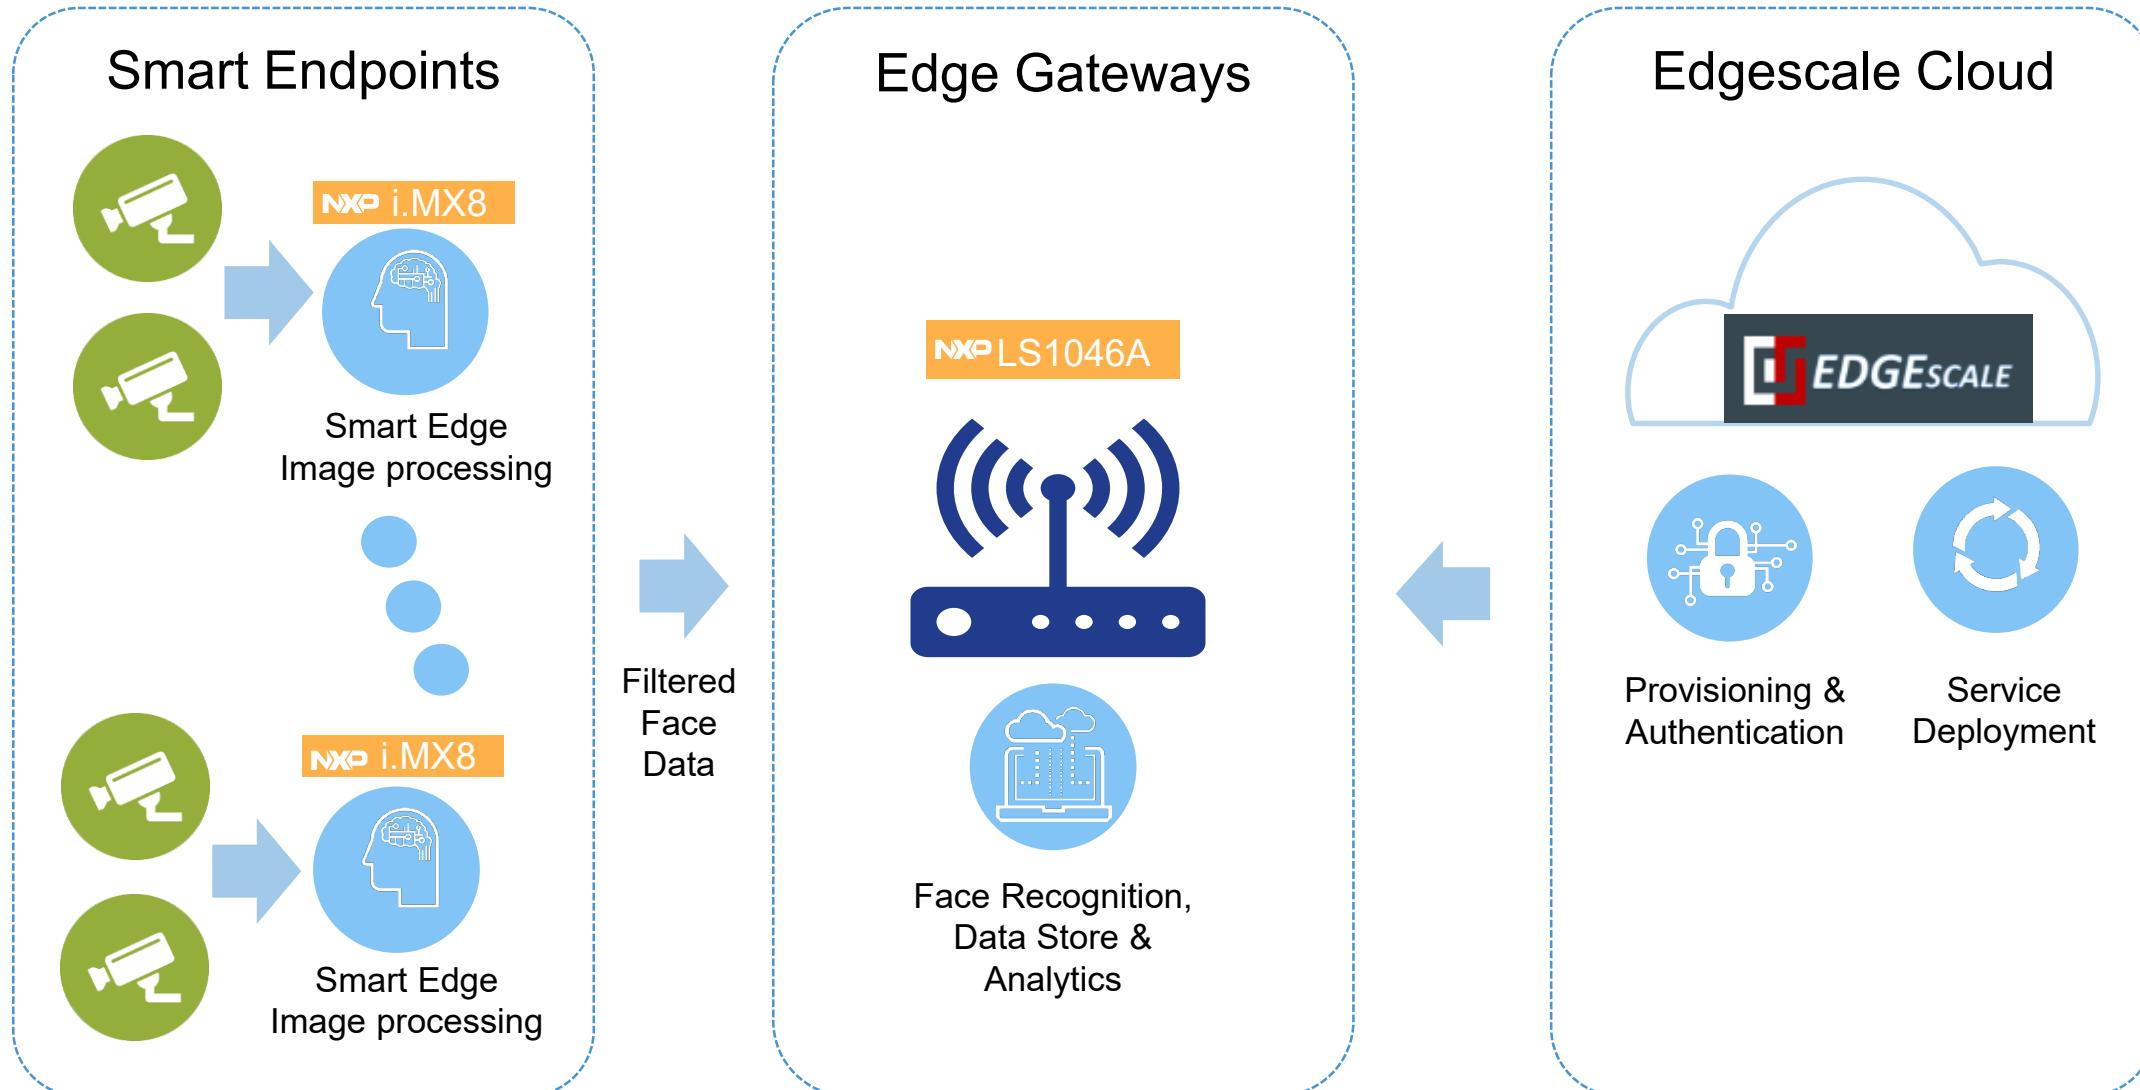

- **Object detection** using TensorFlow shows Machine learning and AI capabilities of FRWY-LS1046A.
- Trained model for almost any object can be added using this method.
- ML/AI capabilities powered by TensorFlow and OpenCV which provide ease of use and smooth deployment and development options to users.

Demo 3.3: People Counting Using Yolo

- YOLO—You only look once, real time object detection.
- Detection Speed using yolo is 45 frames per second.
- Network understands generalized object representation (This allowed them to train the network on real world images and predictions on artwork was still accurate).

Scalable Video Analytics solution

AI @ the Edge vs. Cloud – Performance vs. Practicality

	Cloud Server + GPU	Edge Appliance	Edge App w/TPU
Compute	AMD Ryzen 2600 + nVidia GTX 1080Ti (12 TOps)	Layerscape LS1046	Layerscape LS1046 + TPU
Power	~250W	~10W	~11W
Input Video	MI 6 trailer – 1080p	MI 6 trailer – 720p	MI 6 trailer – 720p
Algorithm	YOLOv3	YOLOv3	YOLOv3
Performance – (FPS)	25 fps	3 fps	30 fps
CPU Utilization	100% 2 cores @ 3.4 Ghz + 85% GPU	100% 4 cores @ 1.8 Ghz	30% 4 cores @ 1.8 Ghz

Great for Formula 1 close finishes.

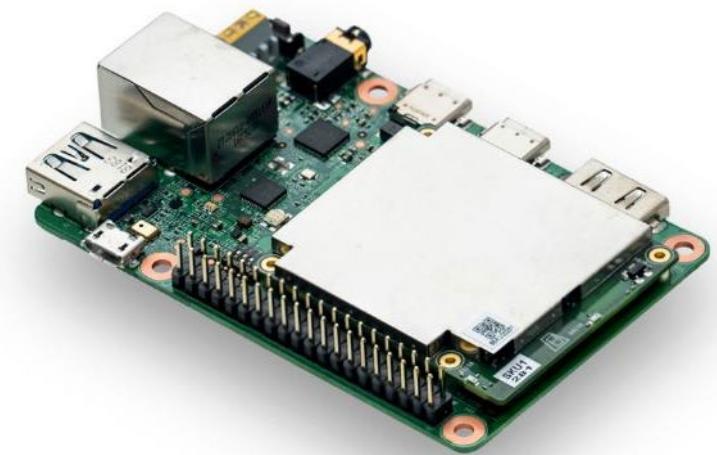

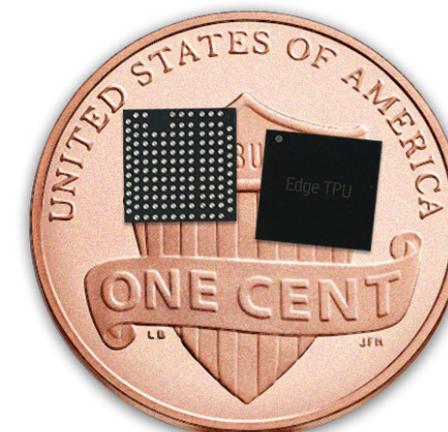

Efficient at counting cars and people in a parking lot.

Great again.

Watch LS1046 object detection sample @ <https://youtu.be/EEc5-oiccuM>

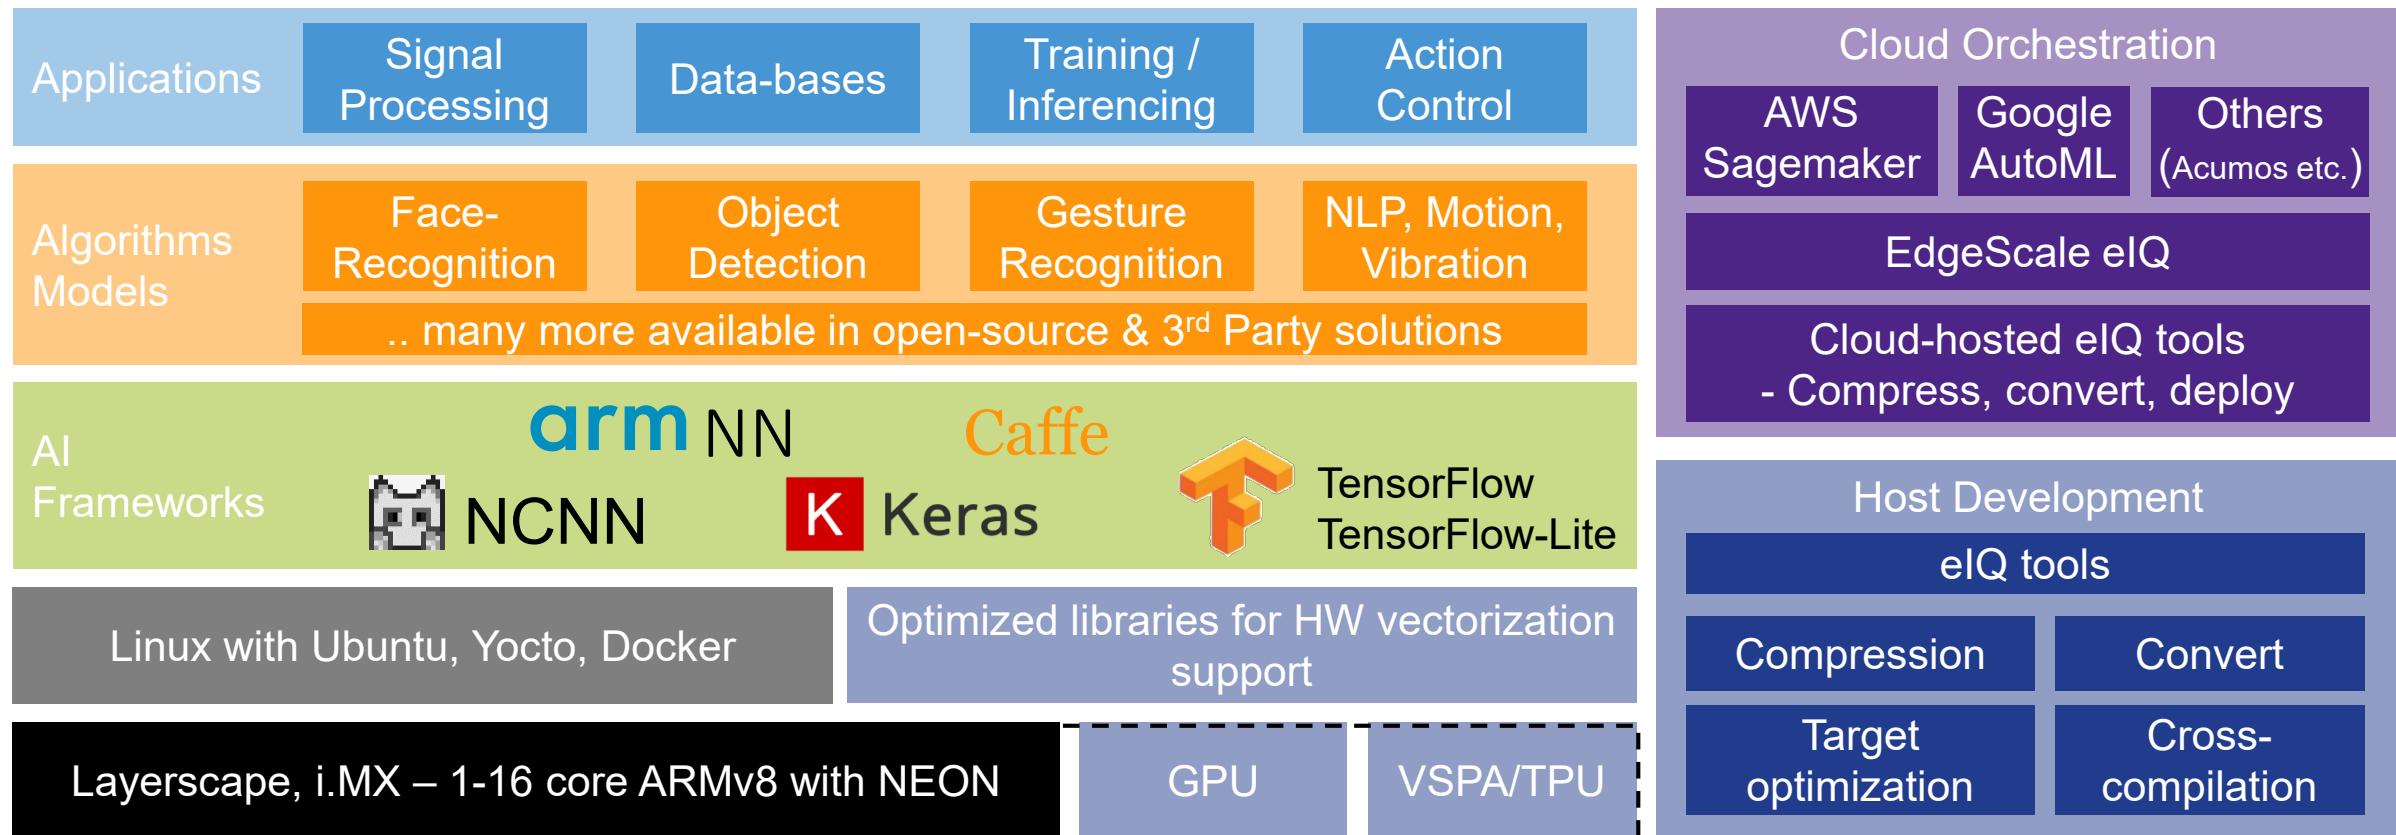

External Coprocessors Like Google Edge TPU Turbocharges AI on Layerscape

Model	Performance (connected through USB or PCIe)
GoogleNet:	600 fps
Inception v2:	400 fps
MobileNet:	700 fps

NXP is working with Google to explore Edge TPU usage in professional/industrial markets.

Edgescale and eIQ for AI on Layerscape & i.MX

- NXP provides the right enablement for cloud-connected AI/ML applications @ Edge.
- Host-based eIQ tools for model conversion, optimization and target optimization.
- Edgescale leverages eIQ tools for cloud-based orchestration and integration with Sagemaker, AutoML etc.
- Helps customer leverage open-source frameworks, models and communities.

A Broad and Scalable Edge Computing Portfolio

- All LS-series processors have rich set of IO – USB, PCIE, SATA, GPIO, I2C, SPI, UART
- All support Trust Architecture for platform security
- Support both embedded and PC Linux distros
- Support industrial temperature ranges
- Support long lifecycles

SolidRun's CEx7 LX2K Computer-on-Module based on the COM Express Type 7 form factor was designed to provide a robust and modular networking computing platform. The CEx7 LX2K features extended processing power, connectivity options and high-end networking capabilities.

Key Features

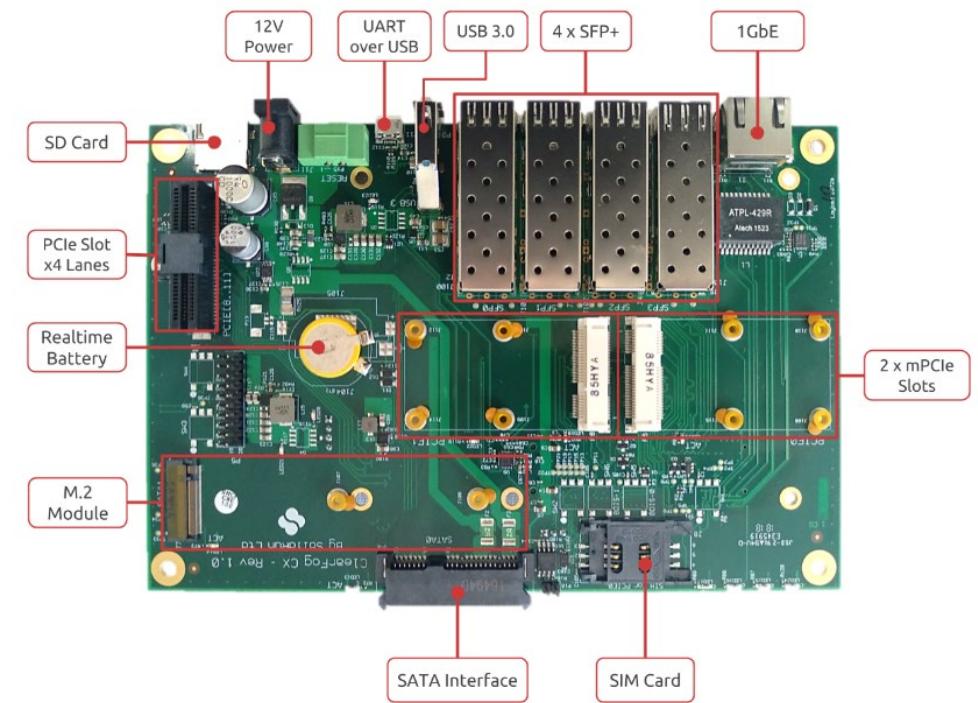

- COM Express type 7 form factor (125mm x 95mm)
- NXP LX2160A 16 core Arm Cortex-A72 (2.2GHz)
- Up to 100GbE with integrated 130Gbps Layer 2 Ethernet switch
- Dual Channel 64-bit DDR4 3200 (up to 64GB)
- Network function virtualization
- 5G packet processing
- 100Gbps data compression/decompression engine
- 18 lanes across 5 PCIe controllers (up to 4 lanes each)
- 2 x SATA
- 2 x USB 3.0

ClearFog CX is a robust embedded platform designed for the COM Express type 7 form factor – offering a flexible and feature-rich carrier for the LX2160A COM. This carrier board features an array of 4 x 10GbE SFP+ connections and 1GbE RJ45 interface.

Key Features

- COM Express type 7 carrier board (basic) form factor
- Low cost, small sized production level board
- 4 x 10GbE via SFP+
- 1 x 1GbE via copper (RJ45)
- M.2 2240/2280 slot, 1 lane (SATA)
- PCIe slot, 4 lanes
- 2 x mPCIe
- Micro SD card slot
- Secondary 64Mb SPI memory
- UART over MicroUSB interface for Debug

Edgescale and eIQ for AI on Layerscape & i.MX

- NXP provides the right enablement for cloud-connected AI/ML applications @ Edge.
- Host-based eIQ tools for model conversion, optimization and target optimization.
- Edgescale leverages eIQ tools for cloud-based orchestration and integration with Sagemaker, AutoML etc.
- Helps customer leverage open-source frameworks, models and communities.

Summary

- NXP has a broad portfolio of processing solutions, well enabled for the demanding smarter edge
- NXP provides the hardware, reference designs, software tools, and services to enable customers to implement Edge computing solution
- LS1046 , LX2160 are available now ! Including in NXP longitiviy program
- Demo available in the LAB
